CHAPTER – II – RISK FACTORS

An investment in our Equity Shares involves a certain degree of risk. You should carefully consider all the information in this Prospectus, including the risks and uncertainties described below, before making an investment in our Equity Shares. The risks described below are not the only ones relevant to us or our Equity Shares or the industry in which we operate. Additional risks and uncertainties not presently known to us or that we currently deem immaterial may also impair our businesses, results of operations, financial condition and cash flows. If any of the following risks or other risks that are not currently known or are currently deemed immaterial actually occur, our businesses, results of operations, financial condition and cash flows could suffer, the trading price of our Equity Shares could decline, and you may lose all or part of your investment. Prospective investors should read this chapter in conjunction with “*Business Overview*”, “*Industry Overview*” and “*Management’s Discussion and Analysis of Financial Condition and Results of Operations*” beginning on pages 135, 113 and 222, respectively of, as well as the financial and other information contained in, this Prospectus.

Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is subject to a legal and regulatory environment which may differ in certain respects from that of other countries. This Prospectus also contains forward-looking statements that involve risks, assumptions, estimates and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of certain factors, including the considerations described below and elsewhere in this Prospectus. For further details, please see the chapter titled “*Forward-Looking Statements*” beginning on page 21 of this Prospectus.

Unless otherwise indicated or context requires otherwise, the financial statement included herein is derived from our Restated Financial Statement for the financial September 30, 2023, year ended March 31 2023, for the financial year ended March 31 2022 and for the financial year ended March 31 2021 included in this Prospectus.

Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify the financial or other implications of any of the risks described in this chapter. In making an investment decision, prospective investors must rely on their own examination of our Company and the terms of the Offer including the merits and risks involved. You should consult your tax, financial and legal advisors about the particular consequences to you of an investment in our Equity Shares.

Materiality

The Risk factors have been determined on the basis of their materiality. The following factors have been considered for determining the materiality.

1. Some events may not be material individually but may be found material collectively.
2. Some events may have material impact qualitatively instead of quantitatively.
3. Some events may not be material at present but may be having material impact in future.

INTERNAL RISK FACTORS

1. ***Our revenues and profitability are directly linked to the exploitation and growth of our Content Library. Any failure to source content could adversely affect our profitability and business growth.***

We earn revenues by exploiting content that we distribute through various distribution channels. Acquisition of content is an integral part of our business. Our ability to successfully acquire content depends on our ability to maintain existing relationships and form new ones, with industry participants. We believe that maintaining relationships with industry players are key to enable us to secure content and also to exploit such content in the future. While we have benefited from long-standing relationships with certain industry participants in the past, there can be no assurance that we will be able to successfully maintain these relationships and continue to have access to content through such means.

2. ***We depend on our relationships with theatre operators and other industry participants to exploit our film content.***

We generate revenues from the exploitation of film content in various distribution channels through agreements with commercial theatre operators, in particular multiplex operators, and with retailers, television operators, OTT platform, digital platform, telecommunications companies and others. Our failure to maintain these relationships, or to establish and capitalise on new relationships, could harm our business or prevent our business from growing, which could have a material adverse effect on our business, prospects, financial condition and results of operations.

While we are primarily engaged in production of film for other production houses, which reduce our exposure to distribution risk, we are subject to the risk that our customers will be exposed to as any failure in collection by our customers may also impact our ability of recovering our outstanding dues.

3. *We may not be paid the full amount of box office revenues to which we are entitled.*

Where we enter into direct distribution through theatrical release of the films produced by us, we will derive revenues from theatrical exhibition of our films by collecting a specified percentage of gross box office receipts from multiplex and single screen theatre operators and, as there is no independent monitoring of such data in India, we rely on theatre operators and our sub-distributors to report relevant information to us in an accurate and timely manner. While some single-screen operators have moved to a digital distribution model that provides greater clarity on the number of screenings given to our films, multiplex operators and many other single-screen operators retain the traditional print model. Our films may continue to be exhibited on many screens which either do not have computerized tracking systems for box office receipts or screening information, or in relation to which we do not have access to audit compliance. There is a risk that gross box office receipts and sub-distribution revenues may be inadvertently or purposefully underreported, misreported or delayed, which could prevent us from being compensated appropriately for exhibition of our films, which could have a material adverse effect on our business, prospects, financial condition and results of operations

4. *Our financial condition and business prospects could be materially and adversely affected if we do not complete the project as planned or if they experience delays or cost overruns.*

The development of projects involves various risks, including, among others, regulatory risk, financing risk and the risk that these projects may ultimately prove to be unprofitable. Entering into such projects may also pose significant challenges to our management, administrative, financial and operational resources. Our projects under production may be delayed or terminated due to a number of factors including: surrounding factors to complete the project on time, within budget or to the standards specified to them; failure to obtain necessary government approvals in time or at all; occurrence of force majeure events; unanticipated cost increases or changes in scope of work granted under the respective concession; accidents or other incidents and contractual disputes with our actors; and inability to obtain adequate financing to complete project.

A delay on account of any of the factors enumerated above, could increase the financing costs associated with the project and cause us to exceed the forecasted budget. We may also be unable to recover the amounts we have invested in the project if the projections contained in the detailed project study/feasibility report for these projects do not materialize. For instance, we experienced certain cost overruns in completing the Project “Bhaukaal” due to Covid-19 which was due for 5 months.

For further information on the time/ cost overrun, see “*History and Certain Corporate Matters–Time/ cost overrun in setting up projects by our Company*” on page 155.

5. *Inability to successfully compete for audiences with films released by other producers and distributors, and with other consumer leisure and entertainment activities.*

Where we release our films theatrical or in any other platform, we may compete directly against other producers and distributors of Indian films in each of our distribution channels. If the number of films released in the market as a whole increase it could create an oversupply of content in the market, in particular at peak theatre release times in India such as school and national holidays and the festivals, which would make it more difficult for our films to succeed. A substantial majority of the theatre screens in India are typically committed at any one time to a limited number of films. If our competitors were to increase the number of films available for distribution while the number of theatre screens remained static, it would be more difficult for us to release our films during optimal release periods. Failure to release during peak periods could cause us to miss potentially higher gross box-office receipts and/or home entertainment revenue, which could have a material adverse effect on our business, prospects, financial condition and results of operations. We also compete with all other sources of entertainment and information delivery, including television, the internet and sporting events such as the Indian Premier League (IPL) for cricket. Technological advancements such as video-on-demand, internet streaming and downloading have increased the number of entertainment and information delivery choices available to consumers and have intensified the challenges posed by audience fragmentation. The increasing number of choices to audiences could negatively impact consumer demand for our films and there can be no assurance that occupancy rates at theatres in India or demand for our other distribution channels will not fall. If our films do not attract a large enough audience, our revenue streams from box office receipts and

our other distribution channels could be adversely affected, which in turn could have a material adverse effect on our business, prospects, financial condition and results of operations.

6. *Piracy of our content may adversely impact our revenues and business.*

Our business is highly dependent on maintenance of intellectual property rights in the entertainment products and services we create. Piracy of media products, including digital and internet piracy and the sale of counterfeit consumer products, may decrease revenue received from the exploitation of our products. Consumer awareness of illegally accessed content and the consequences of piracy is lower in India than in Western countries and the move to digital formats has facilitated high-quality piracy in particular through the internet and cable television. Monitoring infringement of our intellectual property rights is difficult and the protection of intellectual property rights in India may not be as effective as in other countries. Existing copyright and trademark laws in India afford only limited practical protection and the lack of internet-specific legislation relating to trademark and copyright protection creates a further challenge for us to protect our content delivered through such media. Notwithstanding the anti-piracy measures we take, there can be no assurance that we will be able to prevent piracy of our products. Piracy of our films and music content and sales of counterfeit media or platform and continued or increased Bollywood use of our proprietary and intellectual property could result in lost revenue, result in significantly reduced pricing power and could have a material adverse effect on our business, prospects, financial condition and results of operations.

7. *Some viewers or civil society organisations may find our film content objectionable*

It is possible that some viewers in India or abroad may object to film content produced by us based on religious, political, ideological or any other positions held by such viewers. This is particularly true of content that is graphic in nature, including violent or intimate scenes and films that are politically oriented or targeted at a particular segment of the audience. Viewers or civil society organisations, including interest groups, political parties, religious or other organisations may assert legal claims, seek to ban the exhibition of our films, protest against us or our films or object in a variety of other ways.

Any of the foregoing could harm our reputation and could have a material adverse effect on our business, prospects, financial condition and results of operations. The film content that we produce and distribute could result in claims being asserted, prosecuted or threatened against us based on a variety of grounds, including defamation, hurting religious sentiments, invasion of privacy, negligence, obscenity or facilitating illegal activities, any of which could have a material adverse effect on our business, prospects, financial condition or results of operations.

8. *Our ability to exploit our content is limited to the rights that we own or are able to continue to license from third parties.*

A significant portion of our Library is licensed from or to third parties, including on fixed term contracts that will expire or may terminate early. There can be no assurance that, upon expiry or termination of these arrangements, content will be available to us at all or on acceptable financial or other terms (including in relation to technical matters such as encryption, territorial limitation and copy protection). If we are unable in the future to continue to exploit our Library or other content it could have a material adverse effect on our business, prospects, financial condition and results of operations. In addition, we only own certain rights for the exploitation of content, which limits our ability to exploit content in certain media formats. To the extent we do not own the music or other media rights in respect of a particular film, we may only exploit content through those channels in respect of which we do own rights, and any consequent leakage of revenues could have an adverse effect on our ability to generate revenue from a film and recover our costs from acquiring or producing contents.

9. *We have very limited experience in releasing films produced by us.*

We have released our last own production Bollywood film on November 11, 2016, which failed to recover its costs, in its first year of theatrical release, due to implementation of demonetization in India on November 08, 2016. Given that we have not released any Bollywood movies for over 6 years, to the extent we undertake to produce films under our own banner and release own productions in future we may be exposed to greater risks in relation to such productions than would be faced by a more experienced solo producer. Our inexperience may also make it more difficult to attract and retain creative talent for our own productions, and to obtain external financing for such projects. There can be no assurance that future own productions will be completed on time or at all or that they will recover their costs, which could have a material adverse effect on our business, prospects, financial condition and results of operations, and harm our reputation

10. ***We require working capital funds for content acquisition and the failure to obtain additional financing in the form of debt or equity in a timely manner or on terms commercially favorable to us or at all, may adversely affect our content acquisition and our future profitability.***

We require working capital funds for content acquisition and business growth. The actual amount and timing of our fund requirements may also differ from estimates as a result of, among other things, unforeseen delays or cost overruns in acquiring content, changes in business plans due to prevailing economic conditions, unanticipated expenses and regulatory changes. To the extent our planned expenditure requirements exceed our available resources; we will be required to seek additional debt or equity financing. Additional debt financing could increase our interest cost and require us to comply with additional restrictive covenants in our financing agreements. Additional equity financing could dilute our earnings per Equity Share and your interest in our Company and could adversely impact our Equity Share price.

11. ***Our films are required to be certified by the Central Board of Film Certification (CBFC).***

Pursuant to the Indian Cinematograph Act, 1952, all Indian films must be certified by the CBFC, which must keep in mind factors such as the interest of sovereignty, integrity and security of India, friendly relations with foreign states, public order and morality. There can be no assurance that we will be able to obtain any or our desired certification for each of our films in the future and we may have to modify the title, content, characters, storylines, themes or concepts of a given film in order to obtain any certification or a desired certification that will facilitate distribution and exploitation of the film. Any such modification could reduce the appeal of any affected film to our target audience and so reduce our revenues from that film, which could have a material adverse effect on our business, prospects, financial condition and results of operations.

12. ***Any variation in the utilization of the Net Proceeds as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior approval of the shareholders of our Company***

We propose to utilize the Net Proceeds towards meeting working capital and general corporate purposes. For further details of the proposed objects of the Offer, see “Objects of the Offer” beginning on page 93. Further, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of the competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with the Companies Act, 2013 and the SEBI ICDR Regulations, we cannot undertake variation in the utilization of the Net Proceeds as disclosed in this Prospectus without obtaining the approval of the Shareholders through a special resolution. In the event of any such circumstances that require us to vary the disclosed utilization of the Net Proceeds, we may not be able to obtain the approval of the Shareholders in a timely manner, or at all. Any delay or inability in obtaining such approval of the Shareholders may adversely affect our business or operations. Further, our Promoters or controlling shareholders, if applicable, would be required to provide an exit opportunity to the shareholders of our Company who do not agree with our proposal to modify the objects of the Offer, at a price and manner as prescribed by SEBI. Further, we cannot assure you that our Promoters or the controlling shareholders of our Company if applicable, will have adequate resources at their disposal at all times to enable them to provide an exit opportunity. In light of these factors, we may not be able to vary the objects of the Offer to use any unutilized proceeds of the Fresh Issue, if any, even if such variation is in the interest of our Company. This may restrict our Company’s ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Net Proceeds, if any, which may adversely affect our business, financial conditions, cash flows and results of operations

13. ***The trademark used by us is not registered under the Trade Marks Acts, 1999***

As on the date of this Prospectus, we have applied for registration for our Company’s trademark / wordmark. Pending registration, we do not enjoy the statutory protection accorded to a registered trademark. There can be no assurance that our application will succeed. Grounds for refusal of registration may include the validity or scope of the application. If we are unable to obtain a registration, we may still continue to use the Company’s device and logo but the same would remain vulnerable to infringement and passing-off by third parties and we will not be able to enforce any rights against them. We may also need to change our Company’s wordmark which may adversely affect our reputation and business and could require us to incur additional costs. Further, our efforts to protect our intellectual property may not be adequate and may lead to erosion of our business value and our operations could be adversely affected. For details, please refer to chapter titled “***Government and Other Statutory Approvals***” beginning on page 241.

This may lead to litigations and any such litigations could be time consuming and costly and their outcome cannot be guaranteed. Our Company may not be able to detect any unauthorized use or take appropriate and timely steps to enforce or protect our intellectual property, which may adversely affect our business, financial condition and results of operations.

14. ***We cannot predict or forecast if a film will be successful. In addition, changing consumer tastes further compromise our ability to predict which films will be popular with audiences in India and internationally.***

The demand for film production business depends substantially on consumer tastes or preferences that often change in unpredictable ways. There is no assured way that will help us in predicting whether any film will be successful or not. The popularity and economic success of our films depends on many factors including general consumer tastes, the actors and other key talent involved, the promotion and marketing of the film, the availability of alternative forms of entertainment and leisure time activities, general economic conditions, the genre and specific subject matter of the film, its critical acclaim, the breadth and format of its release and other tangible and intangible factors, which we cannot predict with certainty and which may be beyond our control. This could result in anticipated profits not being realised, which could have a material adverse effect on our business prospects, financial condition and results of operations.

15. ***Our financial position and results of operations fluctuate from period to period due to film delivery schedule and other factors and may not be indicative of results for future periods.***

Our Company's business is dependent on the efficiency and timely delivery by the actors, directors and other staff involved in a movie production. Due to a delay in delivery schedule of the films or other factors, our financial position and results of operations may fluctuate from period to period and same may adversely affect our financial condition and results of operations.

16. ***We have in the past entered into related party transactions and may continue to do so in the future.***

We have in the past entered into related party transactions and may continue to do so in the future. Our Company has entered into certain transactions with the Promoter, Promoter Group and Directors. While our Company confirm that all the related party transactions have been conducted on the arm's length basis and they are in compliance with the relevant provisions of Companies Act, 2013 and other applicable law but there can be no assurance that it could not have been achieved on more favourable terms had such transactions not been entered into with related parties. Furthermore, it is likely that we will enter into related party transactions in future. There can be no assurance that such transactions, individually or in aggregate, will not have an adverse effect on our financial condition and results of operations. For details on the related party transactions entered into by our Company, please refer to chapter titled "Restated Financial Statements" on page 166. We further confirm that the related party transactions in the latest audited financials of the Company are in compliance with applicable provisions of Companies Act, 2013.

17. ***We are subject to concentration risks relating to our group of customers in the television broadcast and New Media industry. Any significant adverse changes in this customer group's buying patterns may have a material and adverse effect on our business and results of operation.***

Broadcast syndication is one of our major activities. Television broadcasters source content from us and telecast it across their bouquet of channels, which include GECs as well as movie channels. As the content is procured by the television broadcasters at a bouquet level and there are a limited number of such broadcasters, the number of prospective buyers for our content is limited. Similarly, our content is distributed on New Media and technology through telecom operators and internet streaming websites like YouTube. The number of telecom operators and the streaming websites is limited. Any significant adverse changes in this customer group's buying patterns may have a material and adverse effect on our business and results of operations.

18. ***Our inability to adapt to rapidly changing post production technology in a timely manner or at all may adversely affect our profitability and results of operation.***

We have an in-house state-of-the-art digital post-production studio which provides services such as digital intermediate processing, film restoration, format conversions among others. We rely on third party licenses for the tools and techniques developed in the industry for the aforementioned post production services. Such tools and techniques are prone to rapid changes in technology. We may not be able to adapt to such changes in a timely manner or at all. In order to remain competitive, we could be required to upgrade our technology, and any failure to do so could have a material adverse effect on our business prospects, financial condition and results of operations.

19. ***Our industry is regulated and our business activities require various approvals, licenses, registrations and permissions. Our operations and/or profitability could be adversely affected if we fail to obtain, in a timely manner or at all, or comply with the conditions that may be attached to, such approvals, licenses, registrations and permissions.***

We require various approvals, licenses, registrations and permissions for our business activities. Each regulatory authority may impose its own requirements or delay or refuse to grant approval. If we fail to comply with applicable statutory or regulatory requirements, there could be a delay in the submission or grant of approval for marketing new products. Our business prospects, results of operations and financial condition could be adversely affected if we fail to obtain such approvals, licenses, registrations and permissions, in a timely manner or at all. For details, see the chapter titled **“Government and Other Approvals”** beginning on page 241 of this Prospectus.

20. ***Delays or defaults in client payments could affect our operations.***

We may be subject to working capital risks due to delays or defaults in payment by distribution houses, which may restrict our ability to function efficiently and make payments to others when due. In addition, any delay or failure on our part to produce the films, within the time stipulated by agreements, if pre-signed, to our clients may in turn cause delay in payment or refusal of payment by the client. Such defaults/delays by our clients in meeting their payment obligations to us may have a material effect on our business, financial condition and results of operations.

21. ***We cannot be certain that our services and products do not infringe upon the intellectual property rights of third parties.***

Companies, organisations or individuals, including our competitors, may hold or obtain patents, trademarks, copyright protection or other proprietary rights with respect to their previously developed films, characters, stories, themes and concepts or other entertainment, technology and software or other intellectual property of which we are unaware. In addition, the creative talent that we hire or use in our productions may not own all or any of the intellectual property that they represent they do, which may instead be held by third parties. There can be no assurance that the film content that we produce and distribute or the software and technology we use does not infringe the intellectual property rights of third parties and we may have infringement claims asserted against us. Any claims or litigation, whether justified or not, could be time-consuming and costly, harm our reputation, require us to enter into royalty or licensing arrangements which may not be available on acceptable terms or at all, or require us to undertake creative changes to the film content that we produce or source alternative software or technology. Where it is not possible to do so, claims may prevent us from producing and/or distributing certain film content and/or using certain technology or software in our operations. Any of the foregoing could have a material adverse effect on our business, prospects, financial condition and results of operations.

22. ***There have been instances of non-filing and delayed filing in RoC compliances.***

In the past, there have been instance of non-filing of e-forms MGT-14 for a Board Meeting and General Meeting dated December 10, 2022 for increase in authorized share capital of a Company and Form 32 for resignation of Harman Baweja as Director prior to calendar year 2007 was not found in Company’s record. Despite our efforts for compliance, we cannot provide a guarantee of zero noncompliance with RoC or any other statutory body. In case of any such delay, our profitability could be negatively affected.

23. ***The Qualification and Experience proof of some of our Promoters & Directors may not be available.***

Reliance has been placed on declarations and affidavits furnished by certain of our Directors for details of their profiles included in this Prospectus. Paramjit Harjaspal Baweja, Executive Director, Yatin Gupta, Independent Director and Harjaspal Singh Baweja, Promoter of our Company has been unable to trace copies of certain documents pertaining to his educational qualifications. Our Company has obtained confirmations from him that he has made his best efforts to procure the relevant supporting documents for these disclosures being made in this Prospectus and in spite of such efforts, certain documents were not traceable. Accordingly, reliance has been placed on declarations, undertakings and affidavits furnished by him to disclose details of his educational qualifications in this Prospectus and we have not been able to independently verify these details. Therefore, we cannot assure you that all information relating to the educational qualifications of our Directors included in chapter titled **“Our Management”** beginning on page 159 are complete, true and accurate.

24. *Our Promoters and Directors may have interests in us other than reimbursement of expenses incurred or normal remuneration or benefits.*

Our Promoters are interested in our Company to the extent of any transactions entered into or their shareholding and dividend entitlement in our Company. Our Directors are also interested in our Company to the extent of remuneration paid to them for services rendered as Directors of our Company and reimbursement of expenses payable to them. Our Directors may also be interested to the extent of any transaction entered into by our Company with any other company or firm in which they are shareholders, directors or partners. For further information, see the chapters titled **“Our Management”** and **“Our Promoters and Group Companies”** on pages 159 and 173 of this Prospectus, respectively, and the chapter titled **“Financial Statements”** beginning on page 181 of this Prospectus.

25. *Our Company has not identified Micro, Small or Medium Enterprises as Micro, Small and Medium Enterprise Development, Act 2006*

Our Company has not identified any Micro, Small or Medium Enterprises (MSME) as per Micro, Small and Medium Enterprise Development, Act 2006.

We believe that if we fail to identify any dues outstanding for more than 45 days to any MSME supplier, and fails to file the same in Form MSME -1 to Registrar of Companies (ROC) by the due date, then we may be subject to penal liabilities as per the provisions of the Companies Act, 2013.

27. ***We may not regularly be in a position to distribute dividends, and our ability to pay dividends in the future will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures.***

If we experience any losses it could adversely affect our results of operations and financial condition. For further details, see the chapters titled “**Financial Statements**” and “**Management’s Discussion and Analysis of Financial Condition and Results of Operations**” beginning on pages 181 and 222 of this Prospectus, respectively. The amount of our future dividend payments, if any, will depend upon future earnings, financial condition, cash flows, working capital requirements and capital expenditures. There can be no assurance that we will be able to pay dividends in the event we incur any losses in the future.

28. ***Our insurance coverage may prove inadequate to satisfy future claims against us.***

While we believe that we have insured our registered and corporate offices to ensure our property, including buildings, machinery and equipment, and our film production projects, in a way which we believe is typical in our industry in India and in amounts which we believe to be commercially appropriate, we may become subject to liabilities against which we are not adequately insured or at all or cannot be insured, including when the loss suffered is not easily quantifiable and in the event of severe damage to our reputation. Even if a claim is made under an existing insurance policy, due to exclusions and limitations on coverage, we may not be able to successfully assert our claim for any liability or loss under such insurance policy.

In addition, in the future, we may not be able to maintain insurance of the types or in the amounts which we deem necessary or adequate or at premiums which we consider appropriate. The occurrence of an event for which we are not adequately or sufficiently insured or the successful assertion of one or more large claims against us that exceed available insurance coverage, or changes in our insurance policies (including premium increases or the imposition of large deductibles or co-insurance requirements), could have a material adverse effect on our business, results of operations, financial condition and cash flows.

29. ***Post listing of Equity Shares of our Company, the Promoter & Promoter Group will continue to hold majority control in our Company, which will allow them to determine the outcome of shareholder resolutions / board resolutions.***

With the majority equity stake in our Company, the Promoter Group will be able to influence matters requiring, shareholders' approval, such as approval of financials of our Company, appointment or removal of directors, declaration of dividend etc., which decisions may or may not be what other shareholders desire or believe is in their best interests.

While facts and other statistics in this Prospectus relating to India, the Indian economy and the film entertainment sector have been based on various government publications and reports from government agencies that we believe are reliable, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics have not been prepared or independently verified by us, the BRLM or any of our respective affiliates or advisors and therefore we make no representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled "**Industry Overview**" beginning on page 78. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere.

31. ***We may not be able to sustain effective implementation of our business and growth strategy.***

The success of our business will largely depend on our ability to effectively implement our business and growth strategy. In the past we have generally been successful in execution of our business but there can be no assurance that we will be able to execute our strategy on time and within the estimated budget in the future. If we are unable to implement our business and growth strategy, this may have an adverse effect on our business, financial condition and results of operations.

35. *Our funding requirements and proposed deployment of the Net Proceeds are not appraised by any independent agency and are based on management estimates and may be subject to change based on various factors, some of which are beyond our control*

We intend to use the Net Proceeds for (i) funding working capital requirements; and (ii) general corporate purposes in the manner specified in ‘*Objects of the Offer*’ on page 93. The amount of Net Proceeds to be actually used will be based on our management’s estimates and has not been appraised by any bank or financial institution. However, the deployment of the Net Proceeds will be monitored by an audit committee. Our funding requirements and proposed deployment of the Net Proceeds are based on current conditions and are subject to change in light of changes in external circumstances, costs, business initiatives, other financial conditions or business strategies We may have to reconsider our estimates or business plans due to changes in underlying factors, some of which are beyond our control, such as interest rate fluctuations, changes in cost, and other financial and operational factors. Accordingly, prospective investors in the Offer will need to rely upon our management’s judgment with respect to the use of Net Proceeds. If we are unable to deploy the Net Proceeds in a timely or an efficient manner, it may affect our business and the results of operations.

36. *The extent to which the Coronavirus disease (COVID-19) may affect our business and operations in the future is uncertain and cannot be predicted.*

During the first half of calendar year 2020, COVID-19 spread to a majority of countries across the world, including India. The COVID-19 pandemic has had, and may continue to have, significant repercussions across local, national and global economies and financial markets. In particular, a number of governments and organizations have revised GDP growth forecasts for calendar year 2020 downward in response to the economic slowdown caused by the spread of COVID-19. The global impact of the COVID-19 pandemic has been rapidly evolving and public health officials and governmental authorities have responded by taking measures, such as prohibiting people from assembling in large numbers, instituting quarantines, restricting travel, issuing “stay-at-home” orders and restricting the types of businesses that may continue to operate, among many others. On March 14, 2020, India declared COVID-19 as a “notified disaster” and imposed a nationwide lockdown beginning on March 25, 2020. The lockdown lasted until May 31, 2020, and has been extended periodically by varying degrees by state governments and local administrations. The lifting of the lockdown across various regions has been regulated with limited and progressive relaxations being granted for movement of goods and people in other places and calibrated re-opening of businesses and offices. Despite the lifting of the lockdown, there is significant uncertainty regarding the duration and long-term impact of the COVID-19 pandemic, as well as possible future responses by the Government, which makes it impossible for us to predict with certainty the impact that COVID-19 will have on our business and operations in the future. We are closely monitoring the impact of COVID-19 on our financial condition, liquidity, operations, suppliers and workforce. Any intensification of the COVID-19 pandemic or any future outbreak of another highly infectious or contagious disease may adversely affect our business, results of operations and financial condition.

37. *We have, in the last 12 months, issued Equity Shares at a price that could be lower than the Offer Price.*

38. *Certain agreements may not be adequately stamped or may not have been registered as a result of which our operations may be impaired.*

Our Company in the ordinary course of business enters into various understanding/engagement/agreement/MOUs with respect to our scope of services, content, etc. As an industry practice this document are executed on letterhead, plain paper and are not stamped. Few of our agreements may not be adequately stamped or registered. The effect of inadequate stamping is that the document may not be admissible as evidence in legal proceedings and parties to that agreement may not be able to legally enforce the same, except after paying a penalty for inadequate stamping. The effect of non-registration, in certain cases, may make the document inadmissible in legal proceedings.

While there are no instances where our Company has entered into any disputes nor any disputes is alleged against our Company with respect to such service agreements and hence, we may not able to quantified the implication of such inadequate stamping or registration on such service agreement. We cannot assure you that in future we will be not subject to any litigation or claim by any third party.

Some of the key documents, which may not be adequately stamped such as production agreement, co-production term sheet, deed of assignment, film/rights acquisition agreement etc. However, our Company had purchased the stamp duty equal to value of its obligations to avoid any short payment of stamp duty. Our Company further undertakes to pay interest or penalty as and when levied by the appropriate authority. Unless such documents are adequately stamped or duly registered, such documents may be rendered inadmissible as evidence in a court in India or may not be authenticated by any public officer and the same may attract penalty as prescribed under applicable law or may impact our ability to enforce these agreements legally, which may result in an adverse effect on our business, cashflows or profitability.

39. *There are outstanding legal proceedings involving our Company, Directors and Promoter which, if determined adversely, may adversely affect our business and financial condition.*

There are outstanding litigations involving our Company, Directors and Promoter. Any adverse outcome in any of these proceedings may adversely affect our results of operations and financial condition. For further details, please refer the chapter titled “*Outstanding Litigation and Material Developments*” on page no.234 of this Draft Red Herring Prospectus. We cannot assure you that these legal proceedings will be decided in favour of our Company, Directors and Promoter, as the case may be, or that no further liability will arise out of these proceedings. The amounts claimed in these proceedings have been disclosed to the extent ascertainable and quantifiable, on the basis of documents available, and include amounts claimed jointly and severally. Further, such legal proceedings could divert management time and attention and consume financial resources. Any adverse outcome in any of these proceedings may have an adverse effect on our results of operations and financial condition.

40. Any variation in the utilisation of the Offer proceeds as disclosed in this Prospectus shall be subject to certain compliance requirements, including prior approval of our shareholders.

We propose to utilize the Offer proceeds for the following purposes:

- (a) To meet working capital requirements;
- (b) General Corporate purposes; and

For further details of the objects of the Offer, see the chapter **“Objects of the Offer”** on pages 93 of this Prospectus. At this juncture, we cannot determine with any certainty if we would require the Net Proceeds to meet any other expenditure or fund any exigencies arising out of competitive environment, business conditions, economic conditions or other factors beyond our control. In accordance with Section 27 of the Companies Act, 2013, we cannot undertake any variation in the utilisation of the Offer proceeds as disclosed in this Prospectus without obtaining our shareholders' approval through a special resolution. In the event of any such circumstances that require us to undertake variation in the disclosed utilisation of the Offer proceeds, we may not be able to obtain our shareholders' approval in a timely manner, or at all. Any delay or inability in obtaining such shareholders' approval may adversely affect our business or operations.

Further, our Promoters or controlling shareholders would be required to provide an exit opportunity to our shareholders who do not agree with our proposal to modify the objects of the Offer, at a price and manner as may be prescribed by SEBI. SEBI has not yet prescribed any regulations in this regard and such regulations may contain onerous obligations. Additionally, the requirement on Promoters or controlling shareholders to provide an exit opportunity to such dissenting shareholders may deter the Promoters or controlling shareholders from agreeing to the variation of the proposed utilisation of the Offer proceeds, even if such variation is in the interest of our Company. Further, we cannot assure you that the Promoters or the controlling shareholders of our Company will have adequate resources at their disposal at all times to enable them to provide an exit opportunity at the price which may be prescribed by SEBI.

In light of these factors, we may not be able to undertake variation of objects of the Offer to use any unutilized proceeds of the Offer, if any, even if such variation is in the interest of our Company. This may restrict our Company's ability to respond to any change in our business or financial condition by re-deploying the unutilized portion of Offer proceeds, if any, which may adversely affect our business and results of operations.

We have also availed unsecured loans from our Promoter in the ordinary course of business, which are repayable on demand. In the event that the lenders seek repayment of any such loan, we would need to find alternative sources of financing, which may not be available on commercially reasonable terms, or at all. If we are unable to procure such financing, any such demand may materially and adversely affect our business, cash flows, financial condition and results of operations. For details of the outstanding borrowings of our Company as on September 30, 2023, see “Financial Indebtedness” on page 232.

Further, our Company has also availed inter corporate loan of ₹ 50 Lakhs which were repayable within a period of 4 months from the date of the agreement.

EXTERNAL RISK FACTORS

45. *Political, economic or other factors that are beyond our control may have an adverse effect on our business and results of operations.*

The Indian economy and its securities markets are influenced by economic developments and volatility in securities markets in India as well as other countries. Investors' reactions to developments in one country may have adverse effects on the market price of securities of companies located elsewhere, including India. Adverse economic developments, such as rising fiscal or trade deficit, in other emerging market countries may also affect investor confidence and cause increased volatility in Indian securities markets and indirectly affect the Indian economy in general.

In addition to the above, our Company is incorporated in India and its assets are located in India. Consequently, our performance and the market price of the Equity Shares may be affected by interest rates, government policies, taxation, social and ethnic instability and other political and economic developments affecting India.

Factors that may adversely affect the Indian economy, and hence our results of operations, may include:

- the macroeconomic climate, including any increase in Indian interest rates or inflation;
- any exchange rate fluctuations, the imposition of currency controls and restrictions on the right to convert or repatriate currency or export assets;
- any scarcity of credit or other financing in India, resulting in an adverse effect on economic conditions in India and scarcity of financing for our expansions;
- prevailing income conditions among Indian consumers and Indian corporations;
- epidemic, pandemic or any other public health in India or in countries in the region or globally, including in India's various neighboring countries, such as the highly pathogenic H7N9, H5N1 and H1N1 strains of influenza in birds and swine and more recently, the COVID- 19 pandemic;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- terrorism or military conflict in India or in countries in the region or globally, including in India's various neighboring countries;
- occurrence of natural or man-made disasters (such as typhoons, flooding, earthquakes and fires) which may cause us to suspend our operations;
- prevailing regional or global economic conditions, including in India's principal export markets;
- other significant regulatory or economic developments in or affecting India or its consumption sector;
- international business practices that may conflict with other customs or legal requirements to which we are subject, including anti-bribery and anti-corruption laws;
- protectionist and other adverse public policies, including local content requirements, import/export tariffs, increased regulations or capital investment requirements;
- logistical and communications challenges;
- downgrading of India's sovereign debt rating by rating agencies;
- difficulty in developing any necessary partnerships with local businesses on commercially acceptable terms or on a timely basis; and
- being subject to the jurisdiction of foreign courts, including uncertainty of judicial processes and difficulty enforcing contractual agreements or judgments in foreign legal systems or incurring additional costs to do so.

Any slowdown or perceived slowdown due to these factors could have an adverse effect on our business, financial condition and results of operations and reduce the price of our Equity Shares. Any financial disruption could have an adverse effect on our business, future financial performance, shareholders' equity and the price of our Equity Shares.

46. *Any changes in the regulatory framework could adversely affect our operations and growth prospects.*

Our Company is subject to various regulations and policies. For details see chapter titled “**Key Industry Regulations and Policies**” beginning on page no. 148 of this Prospectus. Our business and prospects could be materially adversely affected by changes in any of these regulations and policies, including the introduction of new laws, policies or regulations or changes in the interpretation or application of existing laws, policies and regulations. There can be no assurance that our Company will succeed in obtaining all requisite regulatory approvals in the future for our operations or that compliance issues will not be raised in respect of our operations, either of which could have a material adverse effect on our business, financial condition and results of operations.

47. *If there is any change in tax laws or regulations, or their interpretation, such changes may significantly affect our financial statements for the current and future years, which may have a material adverse effect on our financial position, business and results of operations*

The Government of India may implement new laws or other regulations that could affect the industry, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. To the extent that we are entitled to certain tax benefits in India which are available for a limited period of time, our profitability will be affected if such benefits will no longer be available, or are reduced or withdrawn prematurely or if we are subject to any dispute with the tax authorities in relation to these benefits or in the event we are unable to comply with the conditions required to be complied with in order to avail ourselves of each of these benefits. Please see “Statement of Tax Benefits” on page no. 74 of this Prospectus. In the event that any adverse development in the law or the manner of its implementation affects our ability to benefit from these tax incentives, our business, results of operations, financial condition and prospects may be adversely affected.

48. *A third party could be prevented from acquiring control of us because of anti-takeover provisions under Indian law.*

Indian law has restrictions that could delay, dissuade, or prevent a future takeover or change of control of our Company. An acquirer is defined under the Takeover Regulations as anyone who, directly or indirectly, acquires or agrees to acquire shares, voting rights, or control over a firm, whether acting alone or in collaboration with others. Although these measures have been drafted to safeguard the interests of investors and shareholders, they may also deter a third party from attempting to take control of our Company. Consequently, even if a potential takeover of our Company would result in the purchase of the Equity Shares at a premium to their market price or would otherwise be beneficial to our shareholders, such a takeover may not be attempted or consummated because of Takeover Regulations.

49. *Terrorist attacks, civil unrest and other acts of violence or war involving India and other countries could adversely affect the financial markets and our business.*

Terrorist attacks and other acts of violence or war may negatively affect the Indian markets on which our Equity Shares will trade and also adversely affect the worldwide financial markets. These acts may also result in a loss of business confidence, impede travel and other services and ultimately adversely affect our business. In addition, any deterioration in relations between India and any other country might result in investor concern about stability in the region, which could adversely affect the price of our Equity Shares. India has also witnessed civil disturbances in recent years and it is possible that future civil unrest as well as other adverse social, economic and political events in India could have a negative impact on the value of share prices generally as well as the price of our Equity Shares. Such incidents could also create a greater perception that investment in Indian companies involves a higher degree of risk and could have an adverse impact on our business and the price of our Equity Shares

50. *Any increase in regional hostilities between India and neighbouring countries, could adversely affect Indian economy and cause our business to suffer.*

India has from time-to-time experienced instances of social and civil unrest and hostilities with neighboring countries. Any escalation in regional tension and conflicts in the future could influence the Indian economy and have an adverse effect on our business, our future financial performance and the market for securities of Indian companies, including our equity shares.

51. *Financial instability in other countries may cause increased volatility in Indian financial markets.*

The Indian market and the Indian economy are influenced by economic and market conditions in other countries, including conditions in the United States, Europe and certain emerging economies in Asia. Financial turmoil in Asia, Russia and elsewhere in the world in recent years has adversely affected the Indian economy. Although economic conditions vary across markets, loss of investor confidence in one emerging economy may cause increased volatility across other economies, including India. Any worldwide financial instability may cause increased volatility in the Indian financial markets and, directly or indirectly, adversely affect the Indian economy and financial sector and us. Financial instability in other parts of the world could have a global influence and thereby negatively affect the Indian economy. Financial disruptions could materially and adversely affect our business, prospects, financial condition, results of operations and cash flows.

Furthermore, economic developments globally can have a significant impact on India. Concerns related to a trade war between large economies may lead to increased risk aversion and volatility in global capital markets and consequently have an impact on the Indian economy.

52. *If inflation rises in India, increased costs may result in a decline in profits.*

Inflation rates in India have been volatile in recent years, and such volatility may continue. India has experienced high inflation relative to developed countries in the recent past. Increasing inflation in India could cause a rise in the costs of rent, wages, raw materials and other expenses. High fluctuations in inflation rates may make it more difficult for us to accurately estimate or control our costs. Any increase in inflation in India can increase our expenses, which we may not be able to adequately pass on to our consumers, whether entirely or in part, and may adversely affect our business and financial condition. If we are unable to increase our revenues sufficiently to offset our increased costs due to inflation, it could have an adverse effect on our business, prospects, financial condition, results of operations and cash flows. Furthermore, the GoI has previously initiated economic measures to combat high inflation rates, and it is unclear whether these measures will remain in effect. There can be no assurance that Indian inflation levels will not worsen in the future.

53. *Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares. Accordingly, our ability to raise foreign capital may be constrained.*

As an Indian company, we are subject to exchange controls that regulate borrowing in foreign currencies. Furthermore, under applicable foreign exchange regulations in India, transfer of shares between non-residents and residents are freely permitted (subject to compliance with sectoral norms and certain other restrictions), if they comply with the pricing guidelines and reporting requirements specified under applicable law. If a transfer of shares is not in compliance with such requirements and does not fall under any of the permissible exceptions, then prior approval of the relevant regulatory authority is required. Such regulatory restrictions limit our financing sources and could constrain our ability to obtain financing on competitive terms and refinance existing indebtedness.

Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. Furthermore, this conversion is subject to the shares having been held on a repatriation basis and, either the security having been sold in compliance with the pricing guidelines or, the relevant regulatory approval having been obtained for the sale of shares and corresponding remittance of the sale proceeds. The RBI and the concerned ministries/departments are responsible for granting approval for foreign investment. We cannot assure you that any required regulatory approvals for borrowing in foreign currencies will be granted to us without onerous conditions, or at all. Limitations on foreign debt may have an adverse effect on our business growth, financial condition and results of operations.

54. *Any downgrading of India's debt rating by a domestic or international rating agency could adversely affect our Company's business.*

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our Company's ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing is available. This could harm our Company's business and financial performance and ability to obtain financing for capital expenditures.

55. *Investors may have difficulty in enforcing foreign judgments against our Company or our management.*

Our Company is a limited liability company incorporated under the laws of India. All of our directors and executive officers are residents of India. All of our Company's assets are located in India. As a result, it may be difficult for investors to effect service of process upon us or such persons in India or to enforce judgments obtained against our Company or such parties outside India.

India is not a party to any international treaty in relation to the recognition or enforcement of foreign judgments. India has reciprocal recognition and enforcement of judgments in civil and commercial matters with a limited number of jurisdictions, which includes, the United Kingdom, Singapore, UAE, and Hong Kong. A judgment from certain specified courts located in a jurisdiction with reciprocity must meet certain requirements of the Code of Civil Procedure, 1908, as amended ("Civil Procedure Code"). The United States has not been notified as a reciprocating territory.

In order to be enforceable, a judgment obtained in a jurisdiction which India recognizes as a reciprocating territory must meet certain requirements of the Civil Procedure Code. Section 13 of the Civil Procedure Code provides that foreign judgments shall be conclusive regarding any matter directly adjudicated on except (i) where the judgment has not been pronounced by a court of competent jurisdiction, (ii) where the judgment has not been given on the merits of the case, (iii) where it appears on the face of the proceedings that the judgment is founded on an incorrect view of international law or refusal to recognize the law of India in cases to which such law is applicable, (iv) where the proceedings in which the judgment was obtained were opposed to natural justice, (v) where the judgment has been obtained by fraud or (vi) where the judgment sustains a claim founded on a breach of any law then in force in India. Under the Civil Procedure Code, a court in India shall, on the production of any document purporting to be a certified copy of a foreign judgment, presume that the judgment was pronounced by a court of competent jurisdiction, unless the contrary appears on record; such presumption may be displaced by proving want of jurisdiction. The Civil Procedure Code only permits the enforcement of monetary decrees, not being in the nature of any amounts payable in respect of taxes, or other charges of a like nature or in respect of a fine or other penalty and does not provide for the enforcement of arbitration awards even if such awards are enforceable as a decree or judgment. A foreign judgment rendered by a superior court (as defined under the Civil Procedure Code) in any jurisdiction outside India which the Government of India has by notification declared to be a reciprocating territory, may be enforced in India by proceedings in execution as if the judgment had been rendered by a competent court in India. Judgments or decrees from jurisdictions which do not have reciprocal recognition with India cannot be enforced by proceedings in execution in India. Therefore, a final judgment for the payment of money rendered by any court in a non-reciprocating territory for civil liability, whether or not predicated solely upon the general laws of the non-reciprocating territory, would not be enforceable in India. Even if an investor obtained a judgment in such a jurisdiction against us, our officers or directors, it may be required to institute a new proceeding in India and obtain a decree from an Indian court.

However, the party in whose favor such final judgment is rendered may bring a new suit in a competent court in India based on a final judgment that has been obtained in the United States or other such jurisdiction within three years of obtaining such final judgment. It is unlikely that an Indian court would award damages on the same basis as a foreign court if an action is brought in India. Moreover, it is unlikely that an Indian court would award damages to the extent awarded in a final judgment rendered outside India if it believes that the amount of damages awarded were excessive or inconsistent with public policy in Indian. In addition, any person seeking to enforce a foreign judgment in India is required to obtain the prior approval of the RBI to repatriate any amount recovered, and we cannot assure that such approval will be forthcoming within a reasonable period of time, or at all, or that conditions of such approvals would be acceptable. Such amount may also be subject to income tax in accordance with applicable law.

Consequently, it may not be possible to enforce in an Indian court any judgment obtained in a foreign court, or effect service of process outside of India, against Indian companies, entities, their directors and executive officers and any other parties' resident in India. Additionally, there is no assurance that a suit brought in an Indian court in relation to a foreign judgment will be disposed of in a timely manner.

56. *Our business is mainly dependent on the stability of policies and economic condition of the countries with which we do business.*

The performance and growth of our business is necessarily dependent on the stability of policies and economic conditions of the countries in which we operate, which may be materially and adversely affected by political instability or regional conflicts, a general rise in interest rates, inflation, change in government policies, taxation, and economic slowdown elsewhere in the world or otherwise. Economic growth is

affected by various factors including movements in key imports global economic uncertainty and liquidity crisis, volatility in exchange currency rates and annual rainfall which affects agricultural production. Any continued or future slowdown in the economy of such countries or a further increase in inflation could have a material adverse effect on our services and, as a result, on our business and financial results. Financial turmoil in USA and elsewhere in the world in recent years has affected the Indian economy. Any worldwide financial instability, including the financial crisis and deterioration of credit conditions in these countries, could also have a negative impact on our business.

57. *We may be affected by competition law in India and any adverse application or interpretation of the Competition Act could in turn adversely affect our business.*

The Competition Act prohibits any anti competition agreement or arrangement, understanding or action in concert between enterprises, whether formal or informal, which causes or is likely to cause an appreciable adverse effect on competition in India.

The Competition Act also prohibits abuse of a dominant position by any enterprise. The combination regulation (merger control) provisions under the Competition Act require acquisitions of shares, voting rights, assets or control or mergers or amalgamations that cross the prescribed asset and turnover based thresholds to be mandatorily notified to, and pre-approved by, the Competition Commission of India, or CCI. Any breach of the provisions of Competition Act, may attract substantial monetary penalties.

The Competition Act aims to, among other things, prohibit all agreements and transactions, which may have an appreciable adverse effect in India. Consequently, all agreements entered into by us could be within the purview of the Competition Act. Further, the CCI has extra-territorial powers and can investigate any agreements, abusive conduct or combination occurring outside of India if such agreement, conduct or combination has an appreciable adverse effect in India. We are not currently party to any outstanding proceedings, nor have we ever received any notice in relation to non-compliance with the Competition Act. Any enforcement proceedings initiated by the CCI in future, or any adverse publicity that may be generated due to scrutiny or prosecution by the CCI may affect our business, financial condition and results of operations.

58. *Increasing employee compensation in India may erode some of our competitive advantage and may reduce our profit margins, which may have a material adverse effect on our business, financial condition, cash flows and results of operations.*

Employee compensation in India has historically been significantly lower than employee compensation in the United States and Western Europe for comparably skilled professionals, which has been one of our competitive strengths. However, compensation increases in India may erode some of this competitive advantage and may negatively affect our profit margins. Employee compensation in India is increasing at a faster rate than in the United States and Western Europe, which could result in increased costs relating to scientists and engineers, managers and other mid-level professionals. We may need to continue to increase the levels of our employee compensation to remain competitive and manage attrition. Compensation increases may have a material adverse effect on our business, financial condition, cash flows and results of operations.

59. *Changes or uncertainty in international trade policies or tariffs could disrupt our export sales outside India or negatively impact our financial results.*

Our export sales outside India expose us to number of risks related to trade protection laws, tariffs, excise or other border taxes on products exported to certain countries. Changes or uncertainty in international trade policies or tariffs could impact our global operations, as well as our customers. We may be required to incur additional costs to manufacture and distribute certain of our products. This could adversely impact our business and results of operations.

Risks Relating to the Offer and the Equity Shares

60. *An investment in the Equity Shares is subject to general risk related to investments in Indian Companies.*

Our Company is incorporated in India and all of our assets and employees are located in India. Consequently, our business, results of operations, financial condition and the market price of the Equity Shares will be affected by changes in interest rates in India, policies of the Government of India, including taxation policies along with policies relating to industry, political, social and economic developments affecting India.

61. *The Offer price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Offer and the market price of our Equity Shares may decline below the Offer price and you may not be able to sell your Equity Shares at or above the Offer Price.*

The Price Band and Offer Price of our Equity Shares will be determined before filing of Prospectus with RoC by our Company in consultation with Lead Manager. The price will be based on numerous factors (For further information, please refer chapter titled — “**Basis for Offer Price**” beginning on page 104 of this Prospectus) and may not be indicative of the market price of our Equity Shares after the Offer. The market price of our Equity Shares could be subject to significant fluctuations after the Offer, and may decline below the Offer Price. We cannot assure you that you will be able to sell your Equity Shares at or above the Offer Price. Among the factors that could affect our share price include without limitation. The following:

- Half yearly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;
- Changes in revenue or earnings estimates or publication of research reports by analysts;
- Speculation in the press or investment community;
- General market conditions; and
- Domestic and international economic, legal and regulatory factors unrelated to our performance.

62. *Our Equity Shares have not been publicly traded prior to this Offer. After this Offer, our Equity Shares may experience price and volume fluctuations and an active trading market for our Equity Shares may not develop. Further, the price of our Equity Shares may be volatile, and you may be unable to resell your Equity Shares at or above the Offer Price, or at all.*

Prior to this Offer, there has been no public market for our Equity Shares. An active trading market on the Stock Exchanges may not develop or be sustained after this Offer.

The trading price of our Equity Shares after this Offer may be subject to significant fluctuations in response to factors including general economic, political and social factors, developments in India's fiscal regime, variations in our operating results, volatility in Indian and global securities markets, developments in our business as well as our industry and market perception regarding investments in our business, changes in the estimates of our performance or recommendations by financial analysts, and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. The trading price of our Equity Shares may also decline in reaction to events that affect the entire market and/or other companies in our industry even if these events do not directly affect us and/or are unrelated to our business or operating results.

Fluctuation in the exchange rate between the Indian Rupee and foreign currencies may have an adverse effect on the value of our Equity Shares, independent of our operating results.

On listing, our Equity Shares will be quoted in Indian Rupees on the Stock Exchanges. Any dividends in respect of our Equity Shares will also be paid in Indian Rupees and subsequently converted into the relevant foreign currency for repatriation, if required. Any adverse movement in currency exchange rates during the time that it takes to undertake such conversion may reduce the net dividend to foreign investors. In addition, any adverse movement in currency exchange rates during a delay in repatriating outside India the proceeds from a sale of Equity Shares, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the proceeds received by Equity Shareholders. For example, the exchange rate between the Rupee and the U.S. dollar has fluctuated in recent years and may continue to fluctuate substantially in the future, which may have an adverse effect on the returns on our Equity Shares, independent of our operating results.

63. *QIBs and Non-Institutional Investors are not permitted to withdraw or lower their applications (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting an Application and Retail Individual Investors are not permitted to withdraw their Applications after Application/Offer Closing Date.*

Pursuant to the SEBI ICDR Regulations, QIBs and Non-Institutional Investors are required to pay the Application Amount on submission of the Application, and are not permitted to withdraw or lower their Application (in terms of quantity of Equity Shares or the Application Amount) at any stage after submitting an Application. Retail Individual Investors can revise their Application during the Offer Period and withdraw their Application until Offer Closing Date.

Therefore, QIBs and Non-Institutional Investors would not be able to withdraw or lower their Application, notwithstanding adverse changes in international or national monetary policy, financial, political or economic conditions, our business, results of operations, or otherwise, at any stage after the submission of their Applications.

64. *You may be subject to Indian taxes arising out of capital gains on the sale of our Equity Shares.*

Capital gains arising from the sale of equity shares within 12 months in an Indian company are generally taxable in India. Any gain realised on the sale of listed equity shares on a stock exchange held for more than 12 months will not be subject to capital gains tax in India if Securities Transaction Tax (“STT”) is paid on the transaction. STT is levied on and collected by a domestic stock exchange on which equity shares are sold. Any gain realised on the sale of equity shares held for more than 12 months to an Indian resident, which are sold other than on a recognized stock exchange and on which no STT has been paid, is subject to long term capital gains tax in India. Further, any gain realised on the sale of listed equity shares held for a period of 12 months or less will be subject to short term capital gains tax in India. Capital gains arising from the sale of equity shares is exempt from taxation in India where an exemption from taxation in India is provided under a treaty between India and the country of which the seller is resident.

Generally, Indian tax treaties do not limit India’s ability to impose tax on capital gains. As a result, residents of other countries may be liable to pay tax in India as well as in their own jurisdiction on a gain on the sale of equity shares

65. *Any future issuance of Equity Shares by us may dilute your shareholding and sales of the equity shares by our Promoter, Promoter Group or other major shareholders may adversely affect the trading price of the Equity Shares.*

Any future issuance of Equity Shares by us may dilute your shareholding in us. In addition, any sales of substantial amounts of the Equity Shares in the public market after the completion of the Offer, including by our Promoter or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could materially impair future ability of us to raise capital through offerings of the Equity Shares. After the completion of the Offer, our Promoters will continue to hold 70.69 % of the Post-Paid Equity Shares. We cannot predict the effect, if any, that the sale of the Equity Shares held by our Promoters or other major shareholders or the availability of these Equity Shares for future sale will have on the market price of the Equity Shares.

66. *Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.*

A public company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equities shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution.

However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offer document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights, unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company would be diluted.

67. *There is no guarantee that our Equity Shares will be listed on the EMERGE platform of NSE Limited in a timely manner or at all.*

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Offer and until Allotment of Equity Shares pursuant to this Offer.

In accordance with current regulations and circulars issued by SEBI, our Equity Shares are required to be listed on the stock exchange within such time as mandated under UPI Circulars, subject to any change in the prescribed timeline in this regard. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict your ability to dispose of your Equity Shares.

68. *The requirements of being a listed company may strain our resources.*

We are not a listed company and have historically not been subjected to the compliance requirements and increased scrutiny of our affairs by shareholders, regulators and the public at large associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the SEBI Listing Regulations which will require us to file audited annual and unaudited half-yearly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations or cash flows as promptly as other listed companies.

Further, as a listed company, we will be required to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management attention will be required. As a result, our management's attention may be diverted from our business concerns, which may adversely affect our business, prospects, financial condition, results of operations and cash flows. In addition, we may need to hire additional legal and accounting staff with appropriate experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely and efficient manner.

69. *Rights of shareholders of companies under Indian law may be more limited than under the laws of other jurisdictions.*

Our Articles of Association, composition of our Board, Indian laws governing our corporate affairs, the validity of corporate procedures, directors' fiduciary duties, responsibilities and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive and widespread as shareholders' rights under the laws of other countries or jurisdictions. Investors may face challenges in asserting their rights as shareholder in an Indian company than as shareholders of an entity in another jurisdiction.

70. *The determination of the Price Band is based on various factors and assumptions and the Offer Price of the Equity Shares may not be indicative of the market price of the Equity Shares after the Offer. Further, the current market price of some securities listed pursuant to certain previous issues managed by the Book Running Lead Manager is below their respective issue prices. Our Equity Shares have never been publicly traded, and after the Offer, the Equity Shares may experience price and volume fluctuations, and an active trading market for the Equity Shares may not develop.*

The determination of the Price Band is based on various factors and assumptions and will be determined by our Company and the Promoter Selling Shareholder in consultation with the Book Running Lead Manager. Furthermore, the Offer Price of the Equity Shares will be determined by our Company and the Promoter Selling Shareholder in consultation with the Book Running Lead Manager through the Book Building Process. These will be based on numerous factors, including factors as described under "Basis for the Offer Price" on page 116, and may not be indicative of the market price for the Equity Shares after the Offer. Additionally, the current market price of securities listed pursuant to certain previous initial public offerings managed by the Book Running Lead Manager is below their respective issue price. For further details, see "Other Regulatory and Statutory Disclosures – Price information of past issues handled by the Book Running Lead Manager" on page 245.

The factors that could affect the market price of the Equity Shares include, among others, broad market trends, financial performance and results of our Company post-listing, and other factors beyond our control. We cannot assure you that an active market will develop, or sustained trading will take place in the Equity Shares or provide any assurance regarding the price at which the Equity Shares will be traded after listing.

71. *There are restrictions on daily movements in the trading price of the Equity Shares, which may adversely affect a shareholder's ability to sell Equity Shares or the price at which Equity Shares can be sold at a particular point in time.*

Our listed Equity Shares will be subject to a daily "circuit breaker" imposed on listed companies by the Stock Exchanges, which does not allow transactions beyond certain volatility in the trading price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on the Equity Shares' circuit breaker will be set by the Stock Exchanges based on historical volatility in the price and trading volume of the Equity Shares. The Stock Exchanges are not required to inform our Company of

the percentage limit of the circuit breaker, and they may change the limit without our knowledge. This circuit breaker would effectively limit the upward and downward movements in the trading price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

72. *There may be less information available about the Company in Indian securities markets than in securities markets in other more developed countries.*

There is a difference between the level of regulation, disclosure and monitoring of the Indian securities markets and the activities of investors, brokers and other participants and that of markets in the United States and other more developed economies. SEBI is responsible for ensuring and improving disclosure and other regulatory standards for the Indian securities markets. SEBI has issued regulations on disclosure requirements, insider trading and other matters. There may, however, be less publicly available information about Indian companies than is regularly made available by public companies in more developed economies. As a result, shareholders may have access to less information about our business, results of operations and financial condition than those of our competitors that are listed on the Stock Exchanges and other stock exchanges in India on an ongoing basis than shareholders may have in the case of companies' subject to the reporting requirements of other more developed countries.

73. *Fluctuations in the exchange rate of the Rupee and other currencies could have a material adverse effect on the value of the Equity Shares, independent of our operating results.*

The Equity Shares are quoted in Rupees on the EMERGE Platform of NSE. Any dividends in respect of the Equity Shares will be paid in Rupees and subsequently converted into appropriate foreign currency for repatriation. Any adverse movement in exchange rates during the time it takes to undertake such conversion may reduce the net dividend to investors. In addition, any adverse movement in exchange rates during a delay in repatriating the proceeds from a sale of Equity Shares outside India, for example, because of a delay in regulatory approvals that may be required for the sale of Equity Shares may reduce the net proceeds received by shareholders. The exchange rate of the Rupee has changed substantially in the last two decades and could fluctuate substantially in the future, which may have a material adverse effect on the value of the Equity Shares and returns from the Equity Shares, independent of our operating results.

74. *We may be subject to surveillance measures, such as the Additional Surveillance Measures and the Graded Surveillance Measures by the Stock Exchanges which may adversely affect trading price of our Equity Shares.*

SEBI and Stock Exchanges in order to enhance market integrity and safeguard interest of investors, have been introducing various enhanced pre-emptive surveillance measures. The main objective of these measures is to alert and advice investors to be extra cautious while dealing in these securities and advice market participants to carry out necessary due diligence while dealing in these securities. Accordingly, SEBI and Stock Exchanges have provided for (a) GSM on securities where such trading price of such securities does not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net-worth, price per equity multiple and market capitalization; and (b) ASM on securities with surveillance concerns based on objective parameters such as price and volume variation and volatility.

On listing, we may be subject to general market conditions which may include significant price and volume fluctuations. The price of our Equity Shares may also fluctuate after the Offer due to several factors such as volatility in the Indian and global securities market, our profitability and performance, performance of our competitors, changes in the estimates of our performance or any other political or economic factor. The occurrence of any of the abovementioned factors may trigger the parameters identified by SEBI and the Stock Exchanges for placing securities under the GSM or ASM framework such as net worth and net fixed assets of securities, high low variation in securities, client concentration and close to close price variation.

In the event our Equity Shares are subject to such pre-emptive surveillance measures implemented by any of the Stock Exchanges, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares

Global Economic Overview

Global economic activity remained subdued as the economies continued with fights against the rising inflation, Russia’s war in Ukraine and a resurgence of COVID-19 in China. Inflationary pressures and the Russia-Ukraine war is expected to continue exerting increased pressures on the global economic activity.

Despite the headwinds, several economies including the United States, the Euro Area and major emerging and developing market economies reported strong real GDP growth in the third quarter of 2022. The sources of these surprises were in many cases domestic: stronger-than-expected private consumption and investment amid tight labor markets and greater-than-anticipated fiscal support. Households spent more to satisfy pent-up demand, particularly on services, partly by drawing down their stock of savings as economies reopened. Business investment rose to meet demand. On the supply side, easing bottlenecks and declining transportation costs reduced pressures on input prices and allowed for a rebound in previously constrained sectors, such as motor vehicles. Energy markets have adjusted faster than expected to the shock from Russia’s invasion of Ukraine.

The fourth quarter of 2022 saw the uptick in the growth to have been estimated to have faded away for some of the major economies. US growth remains stronger than expected supported by the continued consumer spending, unemployment near historic lows and plentiful job opportunities.

In most economies, amid the cost-of-living crisis, the priority remains achieving sustained disinflation. With tighter monetary conditions and lower growth potentially affecting financial and debt stability, it is necessary to deploy macroprudential tools and strengthen debt restructuring frameworks. Accelerating COVID-19 vaccinations in China would safeguard the recovery, with positive cross-border spillovers. Fiscal support should be better targeted at those most affected by elevated food and energy prices, and broad-based fiscal relief measures should be withdrawn. Stronger multilateral cooperation is essential to preserve the gains from the rules-based multilateral system and to mitigate climate change by limiting emissions and raising green investment.

Global growth is projected to fall from an estimated 3.4 percent in 2022 to 2.9 percent in 2023, then rise to 3.1 percent in 2024. The forecast for 2023 is 0.2 percentage point higher than predicted in the October 2022 World Economic Outlook (WEO) but below the historical (2000–19) average of 3.8 percent. The rise in central bank rates to fight inflation and Russia’s war in Ukraine continue to weigh on economic activity. The rapid spread of COVID-19 in China dampened growth in 2022, but the recent reopening has paved the way for a faster-than-expected recovery. Global inflation is expected to fall from 8.8 percent in 2022 to 6.6 percent in 2023 and 4.3 percent in 2024, still above pre-pandemic (2017–19) levels of about 3.5 percent. The forecasts for low growth in 2023 reflect the rise in the central bank rates to fight inflation especially in the advanced economies. The growth is estimated to have bottomed out in 2022 for emerging market and developing economies. These forecasts are based on a number of assumptions,

including on fuel and non-fuel commodity prices and on interest rates. The oil prices are expected to fall by on average 16 percent, while non fuel commodity prices are expected to fall by 6.3 percent. The Global interest rate assumptions reflect intensified actual and signaled policy tightening by major central banks since October.

Advanced Economies Group

For advanced economies, growth is projected to slow from 2.7 percent in 2022 to 1.2 percent in 2023 and rising to 1.4 percent in 2024. With the slowdown gathering strength, growth is revised down 0.2 percentage points for 2024. About 90 percent of advanced economies are projected to see a decline in growth in 2023. Growth in the *United States* is projected to decline from 2.0 percent in 2022 to 1.4 percent in 2023 and 1.0 percent in 2024, with growth rebounding in the second half of 2024, growth in 2024 will be faster than in 2023 on a fourth-quarter-over-fourth-quarter basis. Growth in 2023 has been revised upwards by 0.4 percentage point.

The *Euro area*, projected to bottom out at 0.7 percent in 2023 before rising to 1.6 percent in 2024. The upward revision reflects the effects of faster rate hikes by the European Central Bank and eroding real incomes, offset by the carryover from the 2022 outrun, lower wholesale energy prices and additional announcements of fiscal purchasing power support in the form of energy price controls and cash transfers. Growth in the United Kingdom is projected to be -0.6 percent in 2023, reflecting tighter fiscal and monetary policies and financial conditions and higher energy retail prices weighing on household budgets.

Growth in *Japan* is expected to rise at 1.8 percent in 2023. In 2024, growth is expected to decline to 0.9 percent as the effects of past stimulus dissipate. Higher corporate profits from a depreciated yen and earlier delays in implementing previous projects will support business investment. In 2024 however, the growth is expected to decline to 0.9 percent as the effects of past stimulus dissipates.

Emerging Market and Developing Economies Group

Growth in the emerging market and developing economy group is expected to increase from 3.9 percent in 2022 to 4.0 percent in 2023 and 4.2 percent in 2024. About half of emerging market and developing market economies are estimated to have lower growth in 2023 than in 2022.

After a deeper than expected contraction in 2022 to 4.3 percent due to China's economy, growth in *emerging and developing Asia* is predicted to increase to 5.3 percent and 5.2 percent, respectively, in 2023 and 2024. For the first time in more than 40 years, China's real GDP growth will decline in the fourth quarter of 2022, resulting in a 0.2 percentage point reduction for 2022 growth to 3.0 percent. According to projections, China's growth will reach 5.2 percent in 2023 due to rapidly improving mobility, then drop to 4.5 percent in 2024 before stabilizing at less than 4 percent over the medium term due to diminishing business dynamism and weak structural reform efforts. With resilient domestic demand despite external headwinds, the outlook for *India* is expected to decline from 6.8 percent in 2022 to 6.1 percent in 2023 before rising up to 6.8 percent in 2024.

With robust domestic demand despite global constraints, India's growth is predicted to increase to 6.8 percent in 2024 from 6.1 percent in 2023 and 6.8 percent in 2022. Similar forecasts indicate that growth in the ASEAN-5 nations—Indonesia, Malaysia, Philippines, Singapore, and Thailand—will slow to 4.3 percent in 2023 and then rise up to 4.7 percent in 2024.

The *Middle East and Central Asia* are predicted to see slower growth than expected, with the region's growth estimated to fall from 5.3 percent in 2022 to 3.2 percent in 2023, with a downward adjustment of 0.4 percentage point since October. This is mostly due to Saudi Arabia, where growth is projected to decelerate sharply from 8.7 percent in 2022—which was higher than expected by 1.1 percentage points—to 2.6 percent in 2023, with a negative revision of 1.1 percentage points. The downgrade for 2023 reflects mainly lower oil production in line with an agreement through OPEC+, while non-oil growth is expected to remain robust.

In contrast, the expected growth in *South Africa*, following a COVID-19 reopening bounce in 2022, more than halved to 1.2 percent in 2023, suggesting decreased foreign demand, power shortages, and structural constraints.

Inflation and Uncertainty

About 84 percent of countries are expected to have lower headline inflation in 2023 than in 2022. Global inflation is set to fall from 8. Percent in 2022 to 6.6 percent in 2023 and 4.3 percent in 2024—above pre-pandemic levels of about 3.5 percent. The projected disinflation partly reflects declining international fuel and non-fuel commodity prices due to weaker global demand. It also reflects the cooling effects of monetary policy tightening on underlying (core) inflation, which globally is expected to decline from 6.9 percent in the fourth quarter of 2022 (year over year) to 4.5 percent by the fourth quarter of 2023. Still, disinflation will take time: by 2024, projected annual average headline and core inflation will, respectively, still be above pre-pandemic levels in 82 percent and 86 percent of economies.

In advanced economies, annual average inflation is projected to decline from 7.3 percent in 2022 to 4.6 percent in 2023 and 2.6 percent in 2024—above target in several cases. In emerging markets and developing economies, projected annual inflation declines from 9.9 percent in 2022 to 8.1 percent in 2023 and 5.5 percent in 2024, above the 4.9 percent pre-pandemic (2017–19) average. In low-income developing countries, inflation is projected to moderate from 14.2 percent in 2022 to 8.6 percent in 2024—still high, but close to the pre-pandemic average.

The monetary policy tightening has started to cool demand and inflation, but the full impact is unlikely to be realized before 2024. Global headline inflation appears to have peaked in the third quarter of 2022. Prices of fuel and non-fuel commodities have declined, lowering headline inflation, notably in the United States, the Euro Area, and Latin America.

Core inflation is declining in some economies that have completed their tightening cycle (Brazil). But the underlying (core) inflation has not yet peaked in most economies and remains well above pre-pandemic levels.

Medium term inflation expectations generally remain anchored but some of the gauges are up causing the central banks to raise rates faster than expected, especially in the United States and the Euro area, and to signal that rates will stay elevated for longer.

Uncertainties continue to cloud forecasts of global growth and inflation. The adverse shocks of 2022 are expected to have long-lasting effects on output. Although windfall gains and gains from reform may protect some countries (for example, Gulf Cooperation Council members), by 2026, the output loss (cumulative growth) compared with those early 2022 forecasts is projected at 3.0 percent: more than double the initial impact.

Crude Oil:

Slowing global growth and concerns about a global recession have thus far outweighed worries about insufficient oil supply. Oil prices are forecasted to average \$92/bbl. in 2023 and \$80/bbl. in 2024, down from a projected \$100/bbl. in 2022. However, prices will remain well above their recent five-year average of \$60/bbl. The forecast is highly uncertain, with a variety of factors that could materially alter global supply or demand. For supply, these include EU sanctions on Russia and the G7 oil price cap, OPEC+ production capacity, the outlook for U.S. shale oil, and the use and refilling of strategic oil inventories. For demand, they include a potential global recession and the easing of COVID-19 restrictions in China.

External Debt Vulnerability:

The war in Ukraine has helped precipitate a surge in sovereign spreads for some emerging markets and developing economies. This surge comes amid record debt due to the pandemic. Should inflation remain elevated, further policy tightening in advanced economies may add pressure to borrowing costs for emerging markets and developing economies. Some larger emerging market economies are well positioned. But if sovereign spreads increase further, or even just remain at current levels for a prolonged period, debt sustainability may be at risk for many vulnerable emerging markets and developing economies, particularly those hit hardest by energy and food price shocks. With a larger import bill, strained fiscal budgets, and limited fiscal space, any loss of access to short-term funding markets will have significant economic and social consequences. The poor are particularly vulnerable, as fiscal policy support is critical to shielding them from the impact of the food inflation shock. A surge in capital outflows might also cause distress in emerging markets and developing economies with large external financing needs. A widening debt crisis in these economies would weigh heavily on global growth and could precipitate a global recession. Further US dollar strength can only compound the likelihood of debt distress. The weakening of national currencies in emerging markets and developing economies might trigger balance sheet vulnerabilities in economies with large dollar-denominated net liabilities, with immediate risks to financial stability.

Indian Economic Overview

India is expected to have a real GDP growth rate of 6.4 percent for FY24. The first advance estimate released had pegged the GDP growth rate at 7 percent for FY23 making India one of the fastest growing major economies in the world. The forecast is supported by a rebound in private consumption giving a boost to production activity, higher

capital expenditure, near-universal vaccination coverage, as well as return of migrant workers to cities to work in construction sites leading to significant decline in the housing market inventory.

Amid the rising inflationary pressures, global slowdown, tightening of global financial conditions and geopolitical tensions, India is expected to be among the fastest growing major economies in the world. The central bank revised its growth estimates to 6.8 percent for the financial year 2022-23. The near-term growth outlook for the Indian economy is supported by the domestic drivers supported by trends in high frequency indicators. The equity market saw a rise in the portfolio flows, moderation of headline inflation, waning input cost pressures, buoyant corporate sales, increase of investments in fixed assets all form a foundation to a beginning of an upturn in the capex cycle in India which will contribute to a speeding up of growth momentum in the Indian economy.

GDP Growth and Inflation

India's GDP growth in Q3 FY23 slowed to 4.4 percent down from 6.3 percent recorded in the previous quarter. The decrease was mainly due to the second straight contraction in manufacturing activity (1.1 percent YoY in the quarter), showing a weakness in consumer demand and exports. Low base effect introduced during lockdown is fading, attributing to a sharp fall in the year-on-year growth rate. Real GDP in Q3 2022-23 is estimated at Rs 40.19 lakh crore, as against Rs 38.51 lakh crore in Q3 2021-22, showing a growth of 4.4%.

The PMI Manufacturing Index was stable during Q2 FY23 recording figures of 55.1. The growth rate in production of eight key sectors slowed down to 0.1 percent in October against 8.7 percent in the same month last year. The crude oil, natural gas, refinery products and cement output recorded negative growth rate. The PMI recorded a score of 55.4 in January, falling from 57.8 from December's recent high as factory orders and production rose sharply, although at a slower rate.

CPI headline inflation moderated to 5.7 per cent (y-o-y) in December 2022 – after easing to 5.9 per cent in November – on the back of double-digit deflation in vegetable prices. On the other hand, inflationary pressures accentuated across cereals, protein-based food items and spices. Fuel inflation edged up primarily from an uptick in kerosene prices. Core CPI (i.e., CPI excluding food and fuel) inflation rose to 6.1 per cent in December due to sustained price pressures in health, education and personal care and effects.

Food inflation softened, aided by easing inflation in vegetables and edible oils, despite sustained pressures from prices of cereals, milk and spices. Fuel inflation registered some easing in October, driven by softening of price inflation in LPG, kerosene (PDS) and firewood and chips. Core CPI (i.e., CPI excluding food and fuel) inflation persisted at

elevated levels at 6 per cent, with price pressures across most of its constituent sub-groups. The inflation is expected to ease further going into the future and continue to remain in the RBI’s tolerance level of 6 percent as projected by IMF’s World Economic Outlook Database, October 2022.

The easing of inflation in the last two months was driven by strong deflation in vegetables, which may dissipate with the summer season uptick. Headline inflation excluding vegetables has been rising well above the upper tolerance band and may remain elevated, especially with high core inflation pressures. Inflation, therefore, remains a major risk to the outlook. Domestic economic activity is expected to remain resilient aided by the sustained focus on capital and infrastructure spending in the Union Budget 2023-24, even as continuing fiscal consolidation creates space for private investment.

The central bank is expected to continue its fight against inflation by withdrawal of its accommodative policy, leading to further hikes in the repo rate. However, the increase in the interest rates is expected to be lower.

Index of Industrial Production (IIP) is a composite indicator that measures the changes in the volume of production of industrial products during the period. IIP-General was stable during the second quarter, recording levels of 134.4, 131.3 and 134 in July, August, September period respectively. The figure below shows the trend of IIP-General and the manufacturing industry over the last one year.

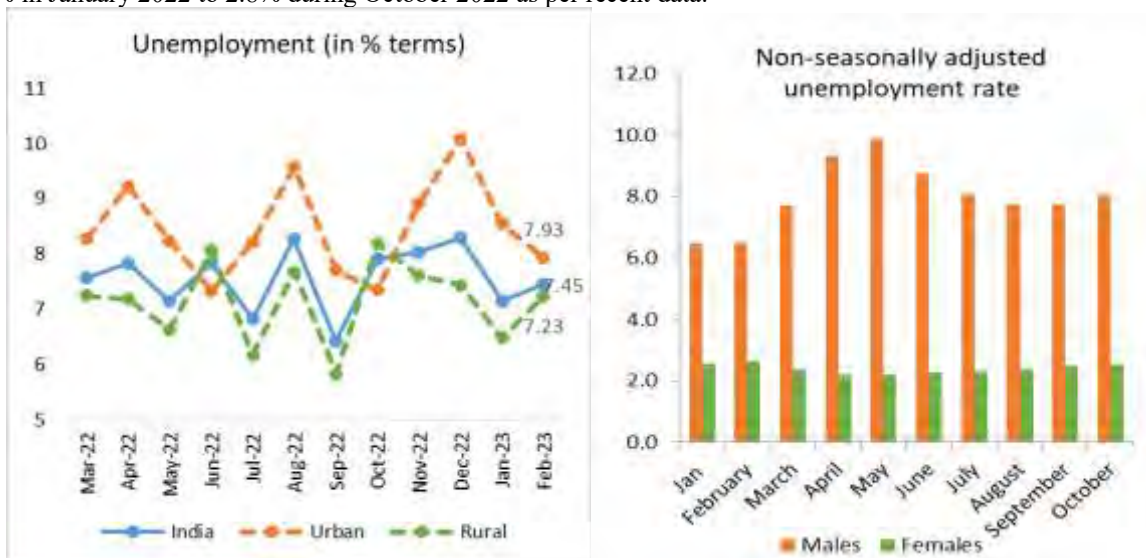

The Investments as a percentage of GDP are expected to remain stable going forward into the future. According to IMF, the investment to GDP ratio is projected to be stable around 33.5 percent in 2025. FDI has seen a constant rise in the last decade, with FY22 receiving an FDI inflow of USD 83.57B, mainly contributed by a substantial increase of inflow in Manufacturing sector of 76 percent Y-o-Y. FDI inflows have increased by 23 percent in comparison to FDI Inflow reported pre-covid. Computer software and hardware (25%) emerged as the top recipient of FDI Equity Inflow followed by Services sector (12%) and Automobile Industry (12%) respectively. To further liberalize and simplify FDI policy for providing Ease of doing business and attract investments, reforms have been undertaken recently across sectors such as Coal Mining, Contract Manufacturing, Digital Media, Single Brand Retail Trading, Civil Aviation, Defence, Insurance and Telecom.

Unemployment

India’s unemployment rate saw an increase to 7.45 percent in February 2023 from 7.14 percent previous month. The urban unemployment was more than the rural unemployment for the last two months as the agricultural activity remained resilient during the period whereas the urban areas reflected an increasing layoff in the Technology sector. The change in trend shows a major decrease in the unemployment rate for the persons aged 15-24 while rates have hovered around the mean for persons aged 25-74. The average unemployment rate (both male and female) was around

3% during the start after which it declined during the months of June-July 2022 and then it again increased during the end. The overall data for the female population shows an increase in the unemployment rate during the year from 2.4% in January 2022 to 2.8% during October 2022 as per recent data.

The revival in the rates may be short lived with another phase of covid restrictions due to the chances of another wave. The recent rate hikes in the monetary policy will lead to less economic spending which in turn will result in decrease in employment ratio. The unemployment rates are expected to increase in the near term amid fears of an impending recession. The data for the coming months is expected to reflect the recent layoffs in technology sector and the ongoing dry spell in startup funding. The revival in the unemployment rates may be short lived with another phase of covid restrictions due to the chances of another wave.

Government spending, imports and exports

Fiscal deficit is an indicator of the borrowings required by the government as it is net of revenue less government expenditure. Total investment by Government related to GDP stands at 32.82% for FY 2022 in various schemes. As per Controller General of Accounts, actual fiscal budget has been met to the tune of 45.6% of the budgeted estimate of FY 2022-23 till October 2022. Receipts collected by government have been 61.2% of the budgeted revenues. The fiscal deficit to GDP ratio stood very high compared to other emerging countries. As per Ministry of Finance, government is keeping inflation under check so that the price surge doesn't result in increase in budgeted expenditure.

India recorded exports to the tune of \$31.99 billion in the month of November 2022 compared to \$31.88 billion in same month last year. The export data is lowest due to lower prices and volumes. Imports stood at \$55.8 billion and grew by 5.6 percent YoY basis. Even though India has exhibited positive growth in exports given the global cues, there is risk of decrease in numbers in near term. Imports too are growing at the same time. The ongoing conflict in Ukraine and Russia, recession fears in western economies and rise of covid cases in China will impact India's exports. The government is launching various schemes and incentives like logistics policy and PM Gati Shakti initiative which may help keep exports under check.

India's current account deficit has widened over the course this year due to shaking exports. The trade deficit has reached \$51.5 billion this fiscal till October. Trade deficit has grown year on year basis as compared to \$73.31 billion during 2021-22 and \$44.03 billion during the year ended 2020-21. India needs to keep under check its current account deficit amid rising economic disruptions in China.

Crude Oil Prices:

The current Brent crude oil prices, recorded as on 9th March 2023, was USD 82.7 per barrel. Oil prices have eased in the latter half of calendar year 2022 from an average of USD 114.81 in May. The fall in prices was due the

apprehensions over another production cut by OPEC+ grouping of oil exporters, including Russia, has contributed to the sharp fall.

The fall in oil prices affects the Current Account balance as India imports nearly 80% of its total oil needs which accounts to one third of the total imports. This fall in price is expected to drive down the value of its imports.

Oil prices affect the entire economy because of the transportation of goods and services. The future outlook is that there would be reduction in the oil prices even further which would reduce the inflation. The fall in oil prices is expected to affect the petroleum exporters in the country. With the windfall taxes being slashed, gives some respite to the petroleum exporters.

Exchange and Forex Reserves:

The USD/INR exchange rate has been increasing due to weakening of the Indian Rupee over the last year. The Indian Rupee depreciated by more than 8 percent this year yet remains one of those more stable currencies when compared to other currencies. The US Dollar has appreciated substantially in calendar year 2022 and such sharp strengthening of the dollar in the matter of months has sizable macroeconomic implications for almost all countries due to the dominance of dollar in international trade and finance.

The depreciating Rupee has increased the burden of the Import bill for essential commodities like crude petroleum, cooking coal, etc. The overall imports in April-November are expected to exhibit a growth of 29.47 percent Y-o-Y. However, the export industry saw unprecedented levels as the exports reached an all-time high exhibiting a growth of 17.72 percent in April-November 2022.

The USD is expected to continue appreciating on the back of contractionary monetary stance of the US Federal Reserve and global inflationary pressures. This adds to the dilemma of the RBI to frame monetary policy to maintain price stability while letting the exchange rates adjust in order to conserve its foreign exchange reserves. The country's reserves were at USD 564.07B as of December, declining from USD 632.7B at the start of the year. The outlook for the Indian Rupee in the short term is expected to be positive supported by global market sentiments, increase FII inflows and softening of crude oil prices.

Road Ahead

India is focusing on renewable sources to generate energy. It is planning to achieve 40% of its energy from non-fossil sources by 2030, which is currently 30% and have plans to increase its renewable energy capacity from to 175 gigawatt (GW) by 2022. In line with this, in May 2021, India, along with the UK, jointly launched a 'Roadmap 2030' to collaborate and combat climate change by 2030.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behavior and expenditure pattern, according to a Boston Consulting Group (BCG) report. It is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by 2040 as per a report by PricewaterhouseCoopers.

India's broad variety of fiscal, monetary, and health measures to the crisis aided its recovery and, together with economic reforms, are assisting in mitigating the crisis's longer-term negative effects. Because of increased food and fuel prices, as well as negative terms of trade, inflation is predicted to soar in the next quarters of FY 2022–23. The RBI will most likely lean toward price stability and, as a result, boost policy rates. The next few months will be crucial for India's economy as the government and the Reserve Bank of India try to balance the pressures on inflation, currency, external accounts, and the budget deficit. The good news is that India has been through the pandemic for over two years and has emerged stronger.

Global Media and Entertainment Industry

The global entertainment & media (E&M) industry surged ahead last year, strongly outpacing overall global economic growth. Following a pandemic-related 2.3% decline in 2020, E&M revenue rose a strong 10.4% in 2021, from US\$2.12trn to US\$2.34trn. With the industry becoming more digital, more mobile and more youth-oriented, virtual reality (VR) and gaming are powerful growth drivers, while digital advertising permeates all of the industry.

The following are findings from PwC's Global Entertainment & Media Outlook 2022-2026, the 23rd annual analysis and forecast of E&M spending by consumers and advertisers across 52 countries and territories:

Global video games and E-sports revenue totaled US\$215.6bn in 2021 and is forecast to grow at an 8.5% CAGR to US\$323.5bn in 2026. Asia Pacific generated the lion's share of revenues in 2021 with US\$109.4bn, almost double North America, the second highest region. Gaming is now the third-largest data-consuming E&M content category, behind video and communications.

VR continues to be the fastest-growing E&M segment, albeit from a relatively small base. Global VR spend rose by 36% y-o-y in 2021 to US\$2.6bn, following on the hot 39% growth in 2020. Growth between 2021 and 2026 is expected at 24% CAGR, bringing the segment to US\$7.6bn. Gaming content is the primary contributor to VR revenue, taking in US\$1.9bn in 2021. This should increase to US\$6.5bn in 2026, 85% of total VR revenue.

Advertising's spread throughout the digital world has made it a dominant industry category. After a decline of nearly 7% in 2020, advertising grew an impressive 22.6% in 2021 to US\$747.2bn. Driven almost entirely by digital, advertising is set to grow at a 6.6% CAGR through 2026. Internet advertising revenue is seen growing even faster, expanding at 9.1% CAGR. In 2026, advertising is projected to be a \$1tn market and the largest E&M revenue stream, having surpassed consumer spending and internet access.

After growing by 35.4% in 2020, Over-the-top (OTT) video surged another 22.8% in 2021, pushing revenues to US\$79.1bn. The pace of OTT revenue growth will moderate somewhat; it is expected to grow at a 7.6% CAGR through 2026, pushing revenues to US\$114.1bn.

Traditional TV, beset by competition from OTT streaming services, still generates considerable revenues, but its inexorable decline will continue, with global revenues projected to shrink at a -0.8% CAGR from US\$231bn in 2021 to US\$222.1bn in 2026.

Global cinema revenue is bouncing back, reversing its pandemic-driven losses, and is expected to reach a new high of US\$46.4bn in 2023. Box office revenue is projected to reach US\$49.4bn in 2026 from US\$20.8bn in 2021, an 18.9% CAGR. China surpassed the US to become the world’s biggest cinema market in 2020, and is expected to retain this leadership through 2026.

Live music revenue is projected to exceed pre-pandemic levels in 2024. Digital music- streaming subscriptions are driving growth in the recorded music sector where revenues are forecast to rise from US\$36.1bn in 2021 to US\$45.8bn in 2026

The growth of content is fueling massive data consumption – 2.6mn petabytes (PB) of data were consumed in 2021, and it is expected to rise at a 26% CAGR to reach 8.1mn PB by 2026. Gaming will be the fastest-growing data consumer over the forecast period, with a 29.6% CAGR expected. Mobile handsets will be the fastest-growing device category between 2021 and 2026, increasing at a 28.8% CAGR and expected to push mobile data consumption up from 1.1mn PB to 3.8mn PB.

North America dominates per capita E&M, but faster growth resides elsewhere.

At a regional level, North America commands by far the highest E&M spend per capita, at US\$2,229, nearly double Western Europe’s US\$1,158. By contrast, Asia Pacific, which was the largest E&M region by revenue in 2021 at US\$844.7bn, has per capita spend of US\$224. The Middle East and Africa have the lowest per capita E&M spend of any region globally, at US\$82.

The top ten growth markets by CAGR, meanwhile, are focused in Latin America, Middle East, Africa and Asia, with OTT video and gaming providing the majority of revenue growth, and Esports and cinema seeing fast growth as well.

Turkey (estimated 14.2% CAGR), Argentina (10.4%), India (9.1%) and Nigeria (8.8%) are top-ranked for E&M consumer spend growth prospects over the five year forecast period.

In rapidly growing markets, some consolidation in more traditional areas was evident. The strong rebound in cinema revenues in India has triggered a scramble to bulk up. In March 2022, cinema operators PVR and Inox Leisure announced they would merge to create India's largest multiplex chain, with a network of 1,500-plus screens branded PVR-INOX. Also, in March 2022, Zee, a powerhouse in regional channels, and Sony Pictures Networks India combined to create India's second-largest entertainment network by revenue, just behind Disney. If approved, the merged entity will have 75 TV channels, two video streaming services, two film studios, a digital content studio and large libraries of programming and music.

Indian Media and Entertainment Industry:

Indian media industry has tremendous scope for growth in all the segments due to rising income and evolving lifestyle. The Indian Media and Entertainment (M&E) industry is a sunrise sector for the economy and is making significant strides. The increasing availability of fast and cheap internet, rising incomes, and increasing purchases of consumer durables have significantly aided the industry. India's media and entertainment industry are unique as compared to other markets. The industry is well known for its extremely high volumes and rising Average Revenue Per User (ARPU).

This significantly aided the country's industry and made India leading in terms of digital adoption and provided companies with uninterrupted rich data to understand their customers better. India has also experienced growing opportunities in the VFX sector as the focus shifted globally to India as a preferred content creator.

Proving its resilience to the world, Indian M&E industry is on the cusp of a strong phase of growth, backed by rising consumer demand and improving advertising revenue. According to a FICCI-EY report, the advertising to GDP ratio is expected to reach 0.4% by 2025 from 0.38% in 2019.

India's media and entertainment (M&E) industry is expected to report revenues amounting to INR 1.6 trillion in FY24 as television (TV) and print media is expected to witness a rebound in advertising revenues, according to a report from rating agency Crisil.

According to the report, the TV industry is expected to see INR 73,500 crore in revenue next year, followed by print media at INR 29,300 crore and digital at INR 28,700 crore. Additionally, the film exhibition segment's market size will reach INR 25,000 crore in FY24, as the sector's recovery will be led by higher average ticket prices and spending per head, an improvement in occupancy levels.

Additionally, digital media will reach growth levels above pre-pandemic levels. The launch of 5G and the further availability of inexpensive internet data will push online video consumption in the country, allowing digital ads to grow and become the second-biggest medium of advertising.

On the other hand, the print media is expected to regain 90% of pre-pandemic revenue by FY24. Experts said that going forward, the M&E industry will be a major driver of the increase in per capita income.

Other than companies offering evolved digital media services, the government's push for the industry such as increasing Foreign Direct Investment (FDI) and creating a National Centre of Excellence for AVGC (animation, visual effects, gaming and comics), India is slowly inching towards becoming the M&E hub of the world.

As per the latest report by the PwC, India's Media and entertainment Industry is expected to reach Rs. 4,30,401 crores (US\$ 53.99 billion) by 2026. Advertising revenue in India is projected to reach Rs. 394 billion (US\$ 5.42 billion) by 2024.

In India, where Disney+Hotstar, Amazon Prime, Netflix and Zee account for most OTT revenues, more than 40 other players are active.

Source: <https://www.pwc.com/gx/en/news-room/press-releases/2022/global-entertainment-and-media-outlook-2022-2026.html>

Television would account for 40% of the Indian media market in 2024, followed by print media (13%), digital advertising (12%), cinema (9%), and the OTT and gaming industries (8%).

Within the M&E sector, Animation, Visual Effects, Gaming and Comic (AVGC) sector is growing at a rate of ~29%, while the audio-visual sector and services is rising at the rate ~25%; is recognised as one of the champion sectors by the Government of India. The AVGC sector is estimated to grow at ~9% to reach ~₹ 3 lakh crores (US\$ 43.93 billion) by 2024, stated Union Minister of Commerce & Industry, Consumer Affairs & Food & Public Distribution and Textiles, Mr. Piyush Goyal.

In 2022 (January-July 2022), PE/VC investments in the media and entertainment industry was at US\$ 3,389 million. FDI inflows in the information and broadcasting sector (including print media) stood at US\$ 9.85 billion between April 2000-September 2022. According to BCG, India's SVOD subscriptions is expected to increase by 51% as compared to 2019 and is estimated to reach 90-100 million by 2022.

India's subscription revenue is projected to grow at a CAGR of 2% and reach ₹ 432 billion (US\$ 4.94 billion).

Key growth drivers included rising demand for content among users and affordable subscription packages.

The Indian mobile gaming market is growing at a pace in tandem with the global trend and is expected to reach US\$ 7 billion in 2025. The online gaming market in India is projected to reach ₹ 155 billion (US\$ 2.12 billion) by 2023, from ₹ 76 billion (US\$ 1.08 billion) in 2020, due to rapid increase in consumption.

By 2025, the number of connected smart televisions are expected to reach ~40-50 million. 30% of the content viewed on these screens will be gaming, social media, short video and content items produced exclusively for this audience by television, print and radio brands. In the second quarter of 2021, smart TV shipments from India increased by 65% YoY, due to rising expansion activities adopted by original equipment manufacturers (OEMs) for their smart TV portfolios. By 2025, ~600-650 million Indians, will consume short-form videos, with active users spending up to 55 to 60 minutes per day.

According to the FICCI-EY media and entertainment industry survey, those who watch online videos through bundled packages (online video services bundled with mobile and broadband connections) will account for half of all online video viewers (399 million) by 2023, up from 284 million in 2020.

As of 2020, India registered ~803 million online video viewers, including streaming services and videos on free platforms such as YouTube. Mobile video viewers stood at 356 million in 2020, driven by rising number of users preferring video content over the last few years.

OTT video services market (video-on-demand and live) in India is likely to post a CAGR of 29.52% to reach US\$ 5.12 billion by FY26, driven by rapid developments in online platforms and increased demand for quality content among users.

The Indian M&E industry is on an impressive growth path. The industry is expected to grow at a much faster rate than the global average rate. This can be majorly credited to rising incomes, increasing internet penetration and a growing push toward digital adoption.

In the long run, growth in the M&E industry is expected in retail advertisement on the back of several players entering the food and beverages segment, E-commerce gaining more popularity in the country, and domestic companies testing out the waters. India's rural regions are expected to be the next regions for growth. India has also gotten on board with 5G and is already planning for 6G well ahead of the future. This push towards digital adoption especially in the rural regions will provide advertisers and publishers with an immense opportunity to capture untapped markets and help grow India's media and entertainment industry forward.

Unless the context otherwise requires, in relation to business operations, in this chapter of this Prospectus, all references to "we", "us", "our" and "our Company" are to "Baweja Studios Limited", as the case may be.

OVERVIEW

Our Company was incorporated as "Baweja Movies Private Limited" on March 16, 2001 under the Companies Act, 1956 with the Registrar of Companies, Mumbai. Further, the name of our Company was changed to "Baweja Studios Private Limited" vide special resolution passed in the Extraordinary General Meeting dated July 09, 2021. The fresh certificate of incorporation consequent to name change was issued on September 06, 2021 by the Registrar of Companies, Mumbai. Subsequently, our Company converted from a private limited company to a public limited company and the name of our Company was changed to "Baweja Studios Limited" pursuant to a fresh certificate of incorporation granted to our Company by the RoC, Mumbai, dated December 01, 2021 bearing CIN U92112MH2001PLC131253.

Harjaspal Singh Baweja (commonly known as Harry Baweja), our founder, has been instrumental in setting up the business of our Company as a production house in the Bollywood film industry. Starting out his producing journey with a blockbuster, "Dilwale" in 1994, he quickly maneuvered his way in getting a deeper understanding of the industry. Over the years he produced and directed over 14 films and established himself and we believe that he soon become a key player in the industry with a very strong goodwill. With an experience of over three decades in the film industry, Harry Baweja with his vast experience has handled various areas of business including strategic planning, implementation and has led the Company's operation over the years. Our current Chairman and Managing Director, Harman Baweja is one of the Promoter of the Company.

Our Promoters have a long history of creating Hindi and Punjabi films backed by an extensive film library. Chaar Sahibzaade, Love Story 2050, Qayamat, Bhaukaal, are some of the popular productions of our Company. Further, our Company has also been engaged in the business of trading of movie rights, where we purchase rights connected to a movie from producers and onward trade them to the exhibitors / streaming platforms.

Our Company has been steadily growing in the field of motion picture production since its inception. As on the date of this Prospectus, we have produced over 22 projects and have 6 films under production and another 7 under pre-production stages. We believe that we would be able to release the under-production project in the next fiscal. Further, our Company is also engaged in various other projects which are presently under the research & development stage.

We are a technology-based content production house that specializes in all formats of commercial films with an aim to push the boundaries of storytelling and technology advancements in our field. As our business process we engage in research & development of scripts, end-to-end production of content, Intellectual Property creation and monetization of rights. We believe we are one of the players in the media and entertainment sector with a proven track record of producing high quality content.

Our strength lies in our approach which revolves around sourcing of content either through in-house story developments, content acquisition, remake rights or adoption of books. After which a thorough selection process is carried out at various levels before starting the project for production. Our management committee then selects an appropriate model (production or co-production) for the project.

In case of production, we undertake the entire production activity of the film while retaining all the rights, titles, interests, copyrights, intellectual property rights, exploitation rights and all other ancillary rights of the films. Production model increases the risk related to a single project as production studio has to bear all expenses and to

look after complete financing. Our Company remains the sole owner and thus is solely responsible for activities such as marketing, promotion, distribution among others and accrue all the revenues.

Whereas in co-production, we serve as line producers wherein we produce the movies and deliver it to the clients (including the ownership and copyrights) as per the agreement for a pre-agreed fee ensuring predictable profits. After that it becomes a collaborative process between the platform/studio and our Company. Whereas the distribution of the content is the sole responsibility of the co-producer. In some cases, we do enter into profit sharing arrangements with our clients. This helps in decreasing the risks related to a single project as the financing is generally taken care by the co-producers as per terms of the agreement while we focus and use our expertise in production of quality content. At every stage of completion of the film, basis the production agreements, we earn our revenues thereby ensuring the predictability of revenues.

Our Company has diversified into digital films, web series, animation films, Punjabi films, advertisement films and music videos. We believe, “Baweja” is a long-standing brand with an aim to be an industry leader in terms of production quality and film-making across all formats. We believe our organization has consistently delivered high-quality multi-format content to the industry, as well as promoted newcomers, exceptional singers, filmmakers, and others who have the potential to contribute to the Indian entertainment industry. Our Company accomplished this through the firm belief of Harman Baweja, that “new talent brings in a new approach and a more fired up team”. We have partnered with some of the top names in the industry across geographies in our quest to develop ground-breaking movies and technical innovations. These include project wise collaboration with a variety of corporations and international award-winning studios.

Further to the primary objectives of making films, our secondary objective is to amplify our films IP by cutting across various derivatives for the same, which could include, remakes, sequels and/or prequels (Chaar Sahibzaade :2, foreign language productions, stage plays, web-series, television productions, documentaries, electronic books (currently in production), comic books, print publications, games (Super V), merchandising, adaptations in different formats across different modes and media, spin-offs, etc.

Our Company is a well-run, self-sufficient organization with its own facilities and equipment. We believe we have strong relations with a pool of talented, inspired, and loyal writers, directors, production teams, post-production studios, and marketing personnel who are in charge of guiding us in every assignment from concept to release in a cost-effective and quality-conscious manner.

While our Company believes that we are an in-house creative producer’s team with experienced professionals and a skilled production team, forming the backbone of the Company. Our focus is on delivering high-quality and cost-effective productions.

OUR BUSINESS MODEL:

Our Company is in the business of originating, creating, developing and producing motion pictures and audio-visual content and their subsequent marketing, distribution and exploitation.

Our Company utilizes substantial part of the capital on development of content. Once content development stage is complete, we move on to lock a funding studio/OTT platform thereby decreasing our risk related to the projects. On locking a funding studio/OTT platform, the production activity begins where the costs relating to production are shared as per the agreement entered. The key is to minimize the risk attached to each project. Our strong business team ensures enough pre-sales for most of our projects prior to production, which mitigates the financial risk of each project considerably.

Basis this our key focus is on development of content across all formats as detailed below:

I. SOURCING CONTENT

We have a detailed process through which we develop our content. Tapping into our broad network across the world, we source content through a combination of content acquisition, in-house story development, remake rights, or rights for adaptations of literature from third-parties. Our primary focus has always been on in-house development. The source contents must go through an initial screening process to identify profitable and feasible options. These options further go through a detailed selection process described in the next step below.

II. SELECTION PROCESS

The selection of the projects whether as an acquisition/co-production or production goes through a thorough process. The selection process takes place at various levels- Firstly, the various creative heads share their inputs on the source material (story/script) based on a pre-designed evaluation method. Thereafter the content head, business head and the chief operating officer evaluate the content on the basis of optimum budget, potential directors, proposed lead cast, focus group evaluations, studio interests and overall market assessment for the same. Eventually, these reports are shared with the managing committee who on the basis of the information, consent to the development of the source material.

On shortlisting of a potential project, we enter into contract with the parties to deliver source material (story, screenplay and dialogues) of the film as per the timelines discussed and as per the terms of the agreements. Once we enter into the contract, the counterparty transfers all the rights (including Intellectual Property Rights) to our Company for a pre-agreed fee.

Then we move on to the next key element of assembling the lead cast and director(s) on the basis of viability and genre of the project. Once we have these key elements in place, we select the most optimal way of taking a project forward either through production or co-production model.

Source material forms the basis of all production and is the very foundation of content creation. Hence, there is an exhaustive process in place to align all aspects, from production to viability.

III. MODEL SELECTION AND EXECUTION

While there is a well- defined process for whether the Company shall follow the acquisition/co-production or production model for a particular project, the Management Committee uses the criteria described above along with their past experiences and relations with Talent and Studios to finally lock the key elements of the project.

With the Senior Management having deep roots within the industry for over 30 successful years, they leverage their relationships across the board in getting industry intelligence and gaps that can be filled with the content that is desired by such Studios/Platforms.

IV. POST PRODUCTION ACTIVITIES

Since we also do line production for most of the movies, we deliver quality content to our clients including, in most cases, transferring of all the rights for a pre-agreed fee as per the agreement. For dubbing, sound, VFX, video post (except for editing which is generally done in-house) we outsource to different studios while we continuously monitor those activities. Then our strong and robust Sales and Marketing team ensures pitching of prime projects at the appropriate time. The team ensures compatibility and reliability with the clients by efficiently servicing their needs and requirements. This enables us to keep long lasting relationship with all our clients. We operate our activities from our registered office and studios located in Mumbai.

Our Company currently has produced/acquired over 22 quality films and series till date, including the ones produced and transferred from SP Creations to Baweja Studios Limited.

BUSINESS PROCESS

Development

The start of a project varies, but generally will begin with development of a script, be it an existing script, a book or a brief story outline. Development may also start with a director and/or writer pitching an idea to our creative Head.

Pre-Production

This is the phase where one would narrow down the options of the production. It is where all the planning takes place before the camera rolls and sets the overall vision of the project. Pre-production also includes work related to the shoot location and casting. Over and above, our in-house Executive Producers set up a team for Line Production best suited to the requirements of the said project. The team syncs with the Director and his team to create the schedule and prepare the final budget for the film. This process is exhaustive as detailed Pre-Production dockets are prepared aligning the vision of the Director and Baweja Studios with the Production Designers, Costumes Stylists, Cinematographers, Action Directors, Choreographers and other key personnel's and HOD's.

Production

During this phase it is key to keep planning ahead of the daily shoot. The primary aim is to adhere to the budget and schedule, which requires constant vigilance. We have our in-house audit team and On-set accountants who oversee all compliances and payments, to keep the budget in check with daily cost report and overall financial analysis.

Principal Photography

It is generally the most expensive phase of film production as this constitutes the majority of expenses incurred such as salaries of actors, director, crew, as well as costs related to locations, equipment's, daily wages, set constructions, special requirements etc. Everything that has happened up to this point is to make principal photography go as smoothly and efficiently as possible. Communication between all parties is crucial during the shoot and the production must maintain a full set of records and strive to remain on time and on budget.

Post-Production

This stage starts when principal photography ends, but they may overlap. The bulk of post-production consists of reviewing the footage and assembling the movie – editing. We have in-house editors that looks after the editing activity. The post production activity is primarily divided into two parts: audio post and video post. The first part of video post: editing is completed at this stage. There will be contributions as required from Visual Effects (VFX), Music and Sound Design which is generally outsourced to different studios considering the output, costs and timelines. For audio post, we have different sound studios from where we do dub and related activities. Once we are done with this, we integrate the contents and deliver it to the studio/platform. Then comes the sales and marketing which is a parallel process to the post production process of content. We make sure that the marketing of the production is in full swing which predominantly includes making the entire poster campaign of the film, teaser promos, film and music trailers, promotions, interviews, etc. making sure right distribution of the project is achieved.

Distribution

Once the film is completed, the distribution phase starts. This is how producers make their money back and a considerable amount of time and energy will be invested to secure the right distribution deals for their projects. The film will go in the cinema and/or be distributed to various platforms OTT platform.

Without a stringent and robust distribution strategy, the other four stages of production are somewhat redundant, at least from a business perspective. Distribution is the final stage in a project for producers looking to make a return-on-investment. This can be from cinema distribution, selling to a TV network or streaming service, or releasing direct to DVD.

Whatever the distribution plan is, the producers will have to spend many hours planning and marketing their piece to ensure the biggest audience and largest return. With the digital age and rapidly converging technologies, viewers are watching content in new and different ways, resulting in the distribution phase which is constantly evolving.

Although distribution is the final stage of the project, the channel of distribution and marketing of the project will be planned in pre-production. If it is planned badly and fails to garner good distribution, then all the other phases will be wasted as nobody views the final product and covers the cost of the project.

ANNEXURE V - RESTATED NOTES TO FINANCIAL STATEMENTS

	<p>Revenue from other fixed-price, fixed-timeframe contracts, where the performance obligations are satisfied over time is recognized using the percentage-of-completion method.</p> <p>Use of the percentage-of-completion method requires the Company to determine the actual efforts or costs expended to date as a proportion of the estimated total efforts or costs to be incurred. Efforts or costs expended have been used to measure progress towards completion as there is a direct relationship between input and productivity. The estimation of total efforts or costs involves significant judgement and is assessed throughout the period of the contract to reflect any changes based on the latest available information. Provisions for estimated losses, if any, on uncompleted contracts are recorded in the period in which such losses become probable based on the estimated efforts or costs to complete the contract.</p> <p>We identified the estimate of total efforts or costs to complete fixed price contracts measured using the percentage of completion method as a key audit matter as the estimation of total efforts or costs involves significant judgement and is assessed throughout the period of the contract to reflect any changes based on the latest available information. This estimate has a high inherent uncertainty and requires consideration of progress of the contract, efforts or costs incurred to- date and estimates of efforts or costs required to complete the remaining contract performance obligations over the term of the contracts.</p> <p>This required a high degree of auditor judgment in evaluating the audit evidence and a higher extent of audit effort to evaluate the reasonableness of the total estimated amount of revenue recognized on fixed-price contracts.</p> <p>Others: -</p> <p>iii) Interest income is recognized on a time proportion basis taking into account the amount outstanding and the rate applicable.</p> <p>In the event Sales/Realizations are subject to certain conditions, eventualities and uncertainties, the Sales/Realizations are deemed to accrue as and when events take place or conditions are fulfilled or uncertainties are removed. Accordingly, such income is accounted only after the events take place or conditions are fulfilled or uncertainties are removed. This is in accordance with Accounting Standard in respect of recognition of revenue and prudential norms.</p>
<p>h)</p>	<p>Inventories</p> <p>i) Inventories of under production content (content under production or content under distribution) and content completed and not released are valued at cost. Production cost get accumulated till the first theatrical or digital release of the content.</p> <p>The borrowing cost directly attributable to a content being produced is capitalized as part of the cost of the content. ANNEXURE V - RESTATED NOTES TO FINANCIAL STATEMENTS

1)	<p>Financial instrument:</p> <p>i. Financial assets</p> <p>a. Initial recognition and measurement The Company classifies financial instruments, or their component parts, on initial recognition as a financial asset, a financial liability or an equity instrument in accordance with the substance of the contractual arrangement. Financial instruments are recognized when the Company becomes a party to the contractual provisions of the instrument. Financial instruments are recognized initially at fair value plus transactions costs that are directly attributable to the acquisition or issue of the financial instrument, except for financial assets at fair value through statement of profit and loss, which are initially measured at fair value, excluding transaction costs (which is recognized in statement of profit and loss).</p> <p>b. Subsequent Measurement</p> <ul style="list-style-type: none">• Financial Assets at amortized cost: A financial asset is subsequently measured at amortized cost if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.• Financial assets at fair value through other comprehensive income (FVTOCI): A financial asset is subsequently measured at fair value through other comprehensive income if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.• Financial assets at fair value through statement of profit and loss (FVTPL): Assets that do not meet the criteria for amortised cost or fair value through other comprehensive income (FVTOCI) are measured at fair value through profit or loss. Gain and losses on fair value of such instruments are recognised in statement of profit and loss. Interest income from these financial assets is included in other income. <p>ii. Impairment of financial assets: - The Company assesses on a forward-looking basis the expected credit losses associated with its assets carried at amortized cost and FVOCI. The impairment methodology applied depends on whether there has been a significant increase in credit risk.</p> <p>Expected credit loss ('ECL') impairment loss allowance (or reversal) recognized during the period is recognized as income/ expense in the Statement of Profit and Loss (P&L). This amount is reflected under the head 'other expenses' in the P&L. The balance sheet presentation for various financial instruments is described below:</p> <p>Financial assets measured as at amortized cost and other contractual revenue receivables - ECL is presented as an allowance, i.e., as an integral part of the measurement of those assets in the balance sheet. The allowance reduces the net carrying amount. Until the asset meets write-off criteria, the Company does not reduce impairment allowance from the gross carrying amount.</p>

ANNEXURE V - RESTATED NOTES TO FINANCIAL STATEMENTS

	<p>iii. Financial Liabilities</p> <p>a. Initial recognition and measurement All financial liabilities are recognized initially at fair value and in case of loans and borrowings and payables, net of directly attributable cost. Fees of recurring nature are directly recognized in statement profit and loss as finance cost.</p> <p>b. Subsequent measurement: Financial liabilities are subsequently carried at amortized cost using the effective interest method. For trade and other payables maturing within one year from the balance sheet date, the carrying amounts approximate fair value due to the short maturity of these instruments.</p> <ul style="list-style-type: none"> ○ Loans and borrowings: - After initial recognition, interest bearing loans and borrowings are subsequently measured at amortized cost using the effective interest rate (EIR) method. Gains and losses are recognized in statement of profit and loss when liabilities are derecognized. Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortization is included as finance cost in the statement of statement of profit and loss. <p>iv. De-recognition of financial instruments The Company derecognizes a financial asset when contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for de-recognition under Ind AS 109. A financial liability (or a part of a financial liability) is derecognized from the company's balance sheet when the obligation specified in the contract is discharged or cancelled or expires.</p> <p>v. Offsetting of financial instruments Financial assets and financial liabilities are offset, and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, to realize the assets and settle the liabilities simultaneously.</p>
l)	<p>Critical accounting estimates and judgements The preparation of the Company restated financial statements in conformity with Ind AS requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accounting disclosures, and the disclosure of contingent liabilities. Estimates and judgements are continuously evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods. Revisions to accounting estimates are recognized in the period in which the estimate is revised.</p>
m)	<p>Retirement Benefits The provision of the Employee's Provident Fund and Miscellaneous Provisions Act, 1952 and The Payment of Gratuity Act, 1972 are not yet applicable to the Company.</p>

n)	Other Accounting Policies These are consistent with the generally accepted accounting practices.
o)	<p>Earnings per Share</p> <p>Basic earnings per share are calculated by dividing the net profit or loss for the period attributable to equity shareholders (after deducting preference dividends and attributable taxes) by the weighted average number of equity shares outstanding during the period. Partly paid equity shares are treated as a fraction of an equity share to the extent that they are entitled to participate in dividends relative to a fully paid equity share during the reporting period. The weighted average number of equity shares outstanding during the period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) that have changed the number of equity shares outstanding, without a corresponding change in resources.</p> <p>For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period are adjusted for the effects of all dilutive potential equity shares.</p>

Our depreciation and amortization expense decreased by 259.42% to ₹ 10.84 Lakhs for Fiscal 2022 from ₹ 3.02 Lakhs for Fiscal 2021. This substantial increase is due to the multifold increase in the property, plant and equipment from ₹ 10.46 Lakhs to ₹ 49.22 Lakhs.

Other Expenses

Our other expenses decreased by 37.41 % to ₹ 122.12 Lakhs for Fiscal 2022 from ₹ 195.12 Lakhs for Fiscal 2021. The principle attribute was generally in line with decrease in Legal & Professional Fees and Repairs and Maintenance Cost.

Tax expenses

Our tax expenses decreased by ₹ 132.84 Lakhs from Fiscal 2022 from ₹ 393.08 Lakhs for Fiscal 2021, primarily due to a decrease in Profit before Tax.

Profit after Tax (PAT)

For the reasons discussed above, our profit after tax decreased by 63.91 % to ₹ 275.94 Lakhs for Fiscal 2022 from ₹ 764.60 Lakhs for Fiscal 2021. During FY21, the company strategically decided to sell off its intellectual property rights to Soham Rockstar Entertainment Pvt. Ltd., which constituted a substantial portion of its revenues. Additionally, the temporary halt in production activities resulted in reduced operational expenses, contributing to higher revenues and profit after tax (PAT) as compared to the fiscal year 2022, when the company resumed its production activities in full swing.

SEBI through the UPI Circulars has proposed to introduce an alternate payment mechanism using Unified Payments Interface ("UPI") and consequent reduction in timelines for listing in a phased manner. UPI has been introduced in a phased manner as a payment mechanism in addition to ASBA for applications by Retail Individual Bidders through intermediaries from January 1, 2019. The UPI Mechanism for Retail Individual Bidders applying through Designated Intermediaries, in phase I, was effective along with the existing timeline of T+6 days ("UPI Phase I"), until June 30, 2019. Subsequently, for applications by Retail Individual Bidders through Designated Intermediaries, the process of physical movement of forms from Designated Intermediaries to SCSBs for blocking of funds was discontinued and RIBs submitting their ASBA Forms through Designated Intermediaries (other than SCSBs) could only use UPI Mechanism with the timeline of T+6 days until further notice pursuant to SEBI circular (SEBI/HO/CFD/DIL2/CIR/P/2020/50) dated March 30, 2020 ("UPI Phase II"). Pursuant to SEBI circular SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023, the final reduced timeline of T+3 days using the UPI Mechanism for applications by UPI Bidders ("UPI Phase III") has been made voluntary for public issues opening on or after September 1, 2023, and mandatory for public issues opening on or after December 1, 2023.

SEBI has issued UPI Circulars in relation to streamlining the process of public Offer of equity shares and convertibles. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under the ASBA) for bids by RIIs through intermediaries with the objective to reduce the time duration from public Offer closure to listing from six working days to up to three working days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circular proposes to introduce and implement the UPI payment mechanism in three phases in the following manner:

Phase I:

This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public Offers, whichever is later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual had the option to submit the Application Form with any of the intermediary and use his / her UPI ID for the purpose of blocking of funds. The time duration from public Offer closure to listing continued to be six working days.

Phase II:

This phase has become applicable from July 1, 2019 and was to initially continue for a period of three months or floating of five main board public Offers, whichever is later. Subsequently, it was decided to extend the timeline for implementation of Phase II until March 31, 2020. Further still, as per SEBI circular SEBI/HO/CFD/DIL2/CIR/P/2020/50 dated March 30, 2020, the current Phase II of Unified Payments Interface with Application Supported by Blocked Amount is continued till further notice. Under this phase, submission of the ASBA Form by RIBs through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI payment mechanism. However, the time duration from public Offer closure to listing continues to be six working days during this phase.

Phase III:

In this phase, the time duration from public issue closure to listing will be reduced to be three Working Days. SEBI vide press release bearing number 12/2023 had approved the proposal for reducing the time period for listing of shares in public issue from existing six working days to three working days, and pursuant to SEBI circular SEBI/HO/CFD/TPD1/CIR/P/2023/140 dated August 9, 2023, the reduced time period of three working days has been made voluntary for public issues opening on or after September 1, 2023, and mandatory for public issues opening on or after December 1, 2023. The Offer will be made under UPI Phase III of the UPI Circular, subject to any circulars, clarification or notification issued by the SEBI from time to time.

Pursuant to the UPI Circulars, SEBI has set out specific requirements for redressal of investor grievances for applications that have been made through the UPI Mechanism. The requirements of the UPI Circulars include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted applications, and the requirement for the bank accounts of unsuccessful

Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalized under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post-Offer BRLM will be required to compensate the concerned investor.

All SCSBs offering facility of making application in public issues shall also provide facility to make application using UPI. Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Bidders using the UPI.

For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the BRLM. Investors must ensure that their PAN is linked with Aadhaar and are in compliance with Central Board of Direct Taxes notification dated February 13, 2020 and press releases dated June 25, 2021, September 17, 2021 and March 28, 2023, and any subsequent press releases in this regard.

Pursuant to the SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2021/2480/1/M dated March 16, 2021, issued by SEBI, as amended by the SEBI circular no. SEBI/HO/CFD/DIL2/P/CIR/2021/570 dated June 2, 2021 and SEBI circular no. SEBI/HO/CFD/DIL2/CIR/P/2022/51 dated April 20, 2022 (the "UPI Streamlining Circular"), SEBI has set out specific requirements for redressal of investor grievances for bids that have been made through the UPI Mechanism. The requirements of the UPI Streaming Circular include, appointment of a nodal officer by the SCSB and submission of their details to SEBI, the requirement for SCSBs to send SMS alerts for the blocking and unblocking of UPI mandates, the requirement for the Registrar to submit details of cancelled, withdrawn or deleted bids, and the requirement for the bank accounts of unsuccessful Bidders to be unblocked no later than one day from the date on which the Basis of Allotment is finalized. Failure to unblock the accounts within the timeline would result in the SCSBs being penalized under the relevant securities law. Additionally, if there is any delay in the redressal of investors' complaints, the relevant SCSB as well as the post-Offer BRLM will be required to compensate the concerned investor.

All SCSBs offering facility of making bid in public Offers shall also provide facility to make bid using UPI.

Our Company will be required to appoint one of the SCSBs as a sponsor bank to act as a conduit between the Stock Exchanges and NPCI in order to facilitate collection of requests and / or payment instructions of the UPI Bidders using the UPI.
